#### POLYMER80 -**POLYMER 80% FRAMES for GLOCK®**

Ergonomic Upgrades, Plus Plenty of **Customization Options for Building Your Glock** 

These are Polymer80's next generation of 80% frames for Glock® pistols that enables you to create a customized handgun yourself, from the bottom up. They come with a finishing jig, an end mill, and all the necessary drill bits you need to complete the remaining 20% of the work to get a finished, working pistol frame. These frames offer high-strength reinforced polymer construction and improved ergonomics over the original of Polymer80 frame that make them superb

platforms for reliable and great-shooting pistols. They are compatible with factory and aftermarket Glock® Gen3 internal components (not compatible with Gen4 parts). Inside, there's a stainless steel locking block to keep the fire control parts in place, and a stainless steel rear rail module that keeps the slide on track through many thousands of firing cycles. Hardened front and rear rail pins ensure the slide/rail/frame interface is - and stays - rock solid. A modified grip profile and improved overall balance make this not only an easier frame to operate and control, but also a unique looking one. Up front, there's an under-receiver Picatinny/STANAG rail for mounting any standard light or laser. The PF940v2 is the "full-size" frame that accepts Glock 17/22/31 Gen3 slides and and components, while the PF940Cv1 is the "compact" frame that accepts Glock 19/23/32 Gen3 slides and components. PF940SC is the subcompact frame that accepts Glock 26/27 Gen3 slides and components. Available ONLY with Standard texture on sides, front, and back of the grip, as described below. **PF9SS** is the correct frame for a Glock 43 sized compact single-stack pistol. Has an extended beavertail, double under-cut triggerquard, a thumb ledge, AND a Picatinny rail for mounting a light or laser. The following texturing configurations are available: Standard with textured grips that aid in recoil control and retention of the pistol under stress. ReadyMod with completely smooth grips, ready for custom stippling to get the exact texture you prefer. The PF940v2-BE/PF940Cv1-BE models are available ONLY at Brownells ("BE" = Brownells Exclusive!) and come with what we're calling "aggressive" texturing on the grips that will give you an exceptionally firm hold to counteract recoil and muzzle rise under any conditions - even when your hands are wet or you're under extreme stress. Colors: Black, Flat Dark Earth (FDE), Ólive Drab Green (ODG), Coyote, TacGrey, and Cobalt. Not all models available in all colors. A note on Cobalt - although this color is usually a deep, vibrant blue, the color of these frames appears to be more of a dark gray or graphite color.

NOTE: Returns will not be accepted once the receiver is modified in any way. All warranty issues must be directed to the manufacturer.

# **BROWNELLS SLIDE KITS for GLOCK®**

A Handy Package Deal on the Foundation for Your New Custom-Built Pistol

Our handy kit packages a Polymer80 80% pistol frame with one of our own Brownells slides for Glock®. The slides has front AND rear cocking serrations, the slot for mounting a Trijicon RMR holographic sight, cuts for factory front and rear sights, and a window on top, forward of the ejection port for enhanced barrel cooling. Polymer80 finishing job and drill bits included.

Special Brownells-exclusive (BRN) texturing option is more aggressive than standard P80 texturing but not as aggressive as P80's "Aggressive Texture"! Kits available with G17-size frame/slide and G19-size frame/slide. Slide and frame in both kits are black. NOTE: Returns will not be accepted once the frame is modified in any way. All warranty issues must be directed to the manufacturer

#### POLYMER80 SIG SAUER P320 PF320PTEX™ GRIP MODULE

Enhanced Ergonomics, Control & **Upgraded Amidextrous Safety** 

We knew this had to happen, right? The makers of the wildly popular 80% frames compatible with Glock® pistols could not resist releasing their own

grip module for the increasingly popular SIG P320. The PF320P-TEXTM Grip Module is designed for compatibility with SIG Sauer factory components for P320™. It offers the comfortable 1911 grip angle favored by so many pistol shooters with P80's signature nonslip PTEX™ grip texture. There's a high beavertail undercut to help you get your hand high, close to the bore access, and an enhanced double-undercut triggerguard and support hand contours - all to help the shooter maintain an excellent hold on the pistol. Finally, there's P80's upgraded ambidextrous magazine release. The PF-320PTEX is compatible with standard and X5 Full-Size and Carry (compact) P320 slides, as well as P320 VTac slides.

#### **SIG SAUER P320/P365** FIRE CONTROL UNIT (FCU)

The Core of a Ridiculously Verstaile, Easily Customizable Modular Pistol System

The FCU is the heart of the SIG P320 and P365 modular pistols and is the "secret sauce" that makes these platforms so amazingly versatile and customizable. That's because the it is the "FFL part" (i.e., serialnumbered) - the core of the gun that the slide and grip modules attach to. As a result,

with one FCU, you can configure your gun into a.... well, we won't say "almost infinite" number of configurations. But a whole lot of them, for sure! From grip modules, magazines, custom slides, barrels, optics, and other accessories, you can configure your P320 or P365 thousands of different ways to match the pistol to your specific carry needs. Match 'em up with the large variety of slides, barrels, and grip modules we offer - sold separately. It's all "drop-in" and plug-n-play. Each FCU has a custom "FCU#####" serial number. Steel construction with a unique Titanium Nitride finish on the main assembly and trigger. P320 has a skeletonized trigger. FFL required for purchase.

#### **POLYMER80 COMPLETE SERIALIZED FRAMES** for GLOCK®

Complete Frame for **Building Custom Pistols -**No D.I.Y. Work Required

Polymer80 truly revolutionized the world of custom pistols with their P80 80% frames. The P80 made it possible for the average shooter, with some basic mechanical skills and tools, to build his or her own custom pistol from the frame up, and without the need bring an an FFL holder to handle the transfer of said frame. If you ARE an FFL holder, Polymer80 now offers these fully finished, serialnumbered frames for use as the foundation of custom pistols. They gives you the ergonomics and advanced features of the original 80% frames, only without the drilling and finishing steps. These frames are ideal for your next competition or duty pistol build. They come stripped and ready for assembly and customization with Glock®compatible parts. Made of high-strength reinforced polymer, ready for multiple applications. Two size options to choose from: Full-size PFS9 frame accepts Glock® G17/22 slide and barrel. PFC9 Compact frame accepts Glock® G19/23 slide and barrel. Available with ReadyMod® blank grip for custom texturing, Standard grip texture, or P80's Aggressive grip texture - your choice, whatever works best for the type of pistol you're building. The Polymer 80 Serialized PFS9/ PFC9 frame for Glock® is ready to serve as the solid foundation of your next build, with almost unlimited customization options! FFL required for purchase.

# SIG SAUER P320/P250 GRIP MODULE

Don't Shoot a P320 Sized for Somebody Else -Customize the Grip To Fit YOU!

Easily change the configuration of your P320 or P250 by dropping its fire control unit (FCU) into a different grip module. We offer a variety of module sizes with different-sized grips to match YOUR hand. Unless otherwise indicated, these modules are for pistols chambered in 9mm Luger, .357 SIG, or .40 SBW. X-Series grip modules are NOT designed for the full-size P320. Will not cover the full-size dust cover, leaving the

recoil spring and guide rod exposed. Does not include the extended magwell and internal weight. Will not work with magazines that have just the words "SIG SAUER" on the baseplate. They are compatible with the baseplates that have the SIG Mark logo on it. **TXG** Grip Module is made of Tungsten-infused polymer that is then molded into the final part. This technologically advanced process results in a grip module that has the weight of steel and the durability and flex of polymer. Install your P320 FCU into a TXG grip module, and you'll have one of the flattest yet softest shooting pistols on the range. Requires X5 or full-size slide assembly. Does not include the extended magwell and internal weight. Accepts ONLY the new-style magazines with the circular SIG Sauer logo and square locking tab on the bottom of the basepad. Mags marked with the circular locking tabs require modification to fit properly.

# WILSON COMBAT SIG P320 WCP320 GRIP MODULE

Ergonimically Enhanced Grip Assembly for Your Modular SIG - Some 1911-Style Touches for Better Comfort & Control

The chameleon-like modularity of the SIG P320 is what has quickly made it a favorite with practical shooters, and as the M17, it will be the of-

ficial U.S. military sidearm for many decades to come. Wilson reengineered the P320 grip module to optimize its practical shooting potential. This molded polymer grip frame will enhance your hold on your P320, make it even easier to operate, and improve your recoil control. Wilson's significant improvements in shape, texture, and overall ergonomics give the P320 the superb feel of an expertly hand-crafted custom pistol - simply by swapping the grip module. It incorporates the suggestions of tactical trainers, champion shooters, and firearms experts into a final product that an unmistakably "Wilson I ook"

Practical upgrades include a high-cut 1911-style beavertail grip tang to help you quickly get the pistol perfectly seated in your hand and aid in smooth draws. The undercut frontstrap and reshaped, radiused triggerquard help you achieve a high grip position, getting your hand as close as possible to the axis for the bore. An enlarged, integrated magwell opening promotes fast reloads and is compatible with the latest-generation SIG Sauer X-series factory magazine basepads. The improved grip traction and increased grip pattern coverage - with Wilson Combat's trademark "starburst" texture pattern on the sides and aggressive texturing on the front and backstrap - make the pistol feel as if it's part of your hand. Handy frame reference serrations help you get the support hand thumb or index finger positioned quickly and consistently. Internal slots accept rodstyle Tungsten weights (not included - not compatible with X-Five Tungsten weight), and the angled "holster cuts" on the light rail aid in snag-free, re-holstering. By the way, the WCP320 is compatible with all standard holsters, as well as with all current-production X-Series magazine base pads. Comes with a factory SIG Sauer magazine release, spring, and lock installed.

# TACTICAL SOLUTIONS RUGER® MARK I/II/III/IV & 22/45 PAC-LITE BARREL/RECEIVER

Provides Competition-Ready Accuracy & Improved Balance For Better Handling

Lightweight, easy to install, replacement barrel/receiver turns your

Ruger Mark III, Mar IV, or 22/45 pistol into a well-balanced, competition-ready firearm in seconds. A button-rifled steel liner works with the integrated, adjustable rear sight and ramped front sight to deliver impressive accuracy. Durable, milled stainless steel ejector is built for reliability and long-lasting performance. ½°-28 tpi muzzle threads enable attachment of the Pac-Lite compensator (sold below) and are pre-drilled and tapped for the Pac-Lite scope base (also sold separately). Fluted model provides further weight reduction.

SPECS: 6061 T6 aluminum, hardcoat anodized, matte Black or O.D. Green (Pac-Lite IV only). 4140 steel-lined barrel. 900' (2.3cm) O.D. 1-16' twist. Pac-Lite fits Ruger Mark III and 22/45; also fits older model Mark IV. II. 22/45 installation may require minor fitting. FFL required for purchase.

#### **GLOCK®**

#### **FACTORY INTERNAL PARTS KITS**

All the Small Bits You **Need To Turn a Stripped** Upper or Lower Half into a **Finished Pistol** 

Convenient kits contain all the internal parts you need to turn a bare factory or Polylmer80 frame OR slide into a complete, ready-toshoot assembly. Parts are all 100% Glock® Factory Original components, so these kits are also excellent aids in rebuilding a clapped-out original factory pistol. Frame Parts Kits available for Subcompact G26 and Compact G19 size (9mm/.40 S&W/.357 SIG) frames, Includes; magazine catch spring, magazine release, trigger housing with ejector, trigger housing pin, locking block pin, slide lock

(& spring), slide release lever (& spring), 5 lb. connector, trigger with trigger bar (6 spring), and trigger pin. G19 Compact kit also available WITHOUT trigger assembly, for folks who want to install the aftermarket trigger of their choice. G26 Gen3/4 slide completion kit contains recoil spring/guide assembly, extractor with loaded chamber indicator (& spring), extractor depressor plunger & spring, firing pin, firing pin safety & spring, firing pin channel liner, firing pin spring cups, firing pin spacer sleeve, and slide plate cover. Add the barrel and sights of your choice.

#### **VOLQUARTSEN RUGER® MARK IV™** LLV COMPETITION UPPER

Optic-Ready Top-Half Turns Your Ruger .22 Into a Competition Target Pistol

Volquartsen developed the LLV Competition Upper to turn the already excellent Ruger® Mark IVTM pistol into an outstanding .22 target pistol. To keep weight to a minimum and maintain perfect receiver-barrel alignment, the receiver and barrel shroud are precision machined from a single piece of aluminum alloy, with a rugged Type III hardcoat anodized matte black finish. The Volquartsen Ruger® Mark IV™ LLV Competition Upper is fitted with a match-grade, stainless steel barrel that has a honed and lapped bore for superb accuracy potential and easy cleaning. The contours and weight distribution are optimized for impeccable balance in the hand. A stainless steel breech face withstands many thousands of firing cycles. Threaded muzzle is standard, thread protector included. The LLV fits on a standard Ruger® Mark IV<sup>TM</sup> grip frame ("lower" receiver). It comes with a Picatinny rail machined into the top of the barrel for installation of an optical sight. Available with a 4.5" barrel, available with adjustable "iron" Target Sights installed that can be used alone or co-witnessed with a non-magnifying red dot sight. FFL required for purchase.

#### **GHOST GRIP PLUG KIT for GEN4 GLOCK®**

Helps Keep Out Dirt & Enhances Magazine Insertion & Removal

Polymer insert fits into gap at bottom of Glock grip to help keep out dirt and gives a beveled edge to help ease magazine removal and insertion. Inloudes two plugs - one for use with back strap, one for use without back strap. Simply choose appropriate plug and insert it into the gap.

SPECS: Polymer, matte black, Fits Gen4 models 19, 17, 22, 23, 31, 32, 34, 35, 37 & 38. Fits only Gen4 pistols. Will not fit SF models.

#100-013-385 Gen4 Grip Plug Kit, 7K7G64
---

#### **GRIP FORCE GRIP ADAPTER for GLOCK®**

Helps Improve Hold & Sight Acquisition For Fast Follow Up Shots

Easy to install adapter helps improve grip and shooting control. Modifies the backstrap angle to create a subtle change in grip and wrist positioning that helps en-

hance pointability for improved sight acquisition and faster follow up shots. Extended tang increases leverage for better control during rapid fire and helps the user form the proper shooting grip, especially when drawing from a holster. Also prevents the slide from making contact with the skin between thumb and forefinger. Comes with a Gen 123SC adapter that features a smooth tang and a shorter backstrap. Easy to install with the included trigger housing pin. No permanent modifications to the gun; won't damage the pistol or mar the frame.

SPECS: Textured plastic, black. Gen 123SC adapter fits Gen 4 pistols in the short frame configuration or with the Medium grip panel installed. **Gen 123** adapter fits Glock Gen 1, 2, 3 pistols and the Gen 4 pistol with the Medium grip panel installed. May not fit pistols with letter L serial number prefix (i.e., LXX123). Increases trigger reach by .077" (1.96mm) and tang area thickness by .084" (2.13mm). Gen 4 adapter fits Glock Gen 4 pistols in the "SF" (short frame) configuration to give the pistol a more upright backstrap/grip angles, will not fit over the Medium or Large grip panels. Increases trigger reach by .091" (2.31mm) and tang area thickness by .085" (2.16mm).

	5C75E99	\$ 79.99

# **TANGODOWN**

#### VICKERS TACTICAL GRIP PLUG/ **TOOL for GLOCK®**

Ever since the Glock 17 first came out, aftermarket parts makers have supplied a "grip plug" to seal off the void in the back of the molded polymer grip frame behind the

down there, but... what if that space could be used for something really useful? Vickers's Grip Plug/Takedown Tool is a handy pin-punch tool for field stripping your Glock that conveniently stows in the grip cavity until you need it. As a bonus, it also serves as a mini magwell ramp and index point to aid in smooth, rapid magazine insertion. Exterior is fully radiused - won't snag on holster or clothing. Of course, when inserted into the grip, the tool seals off the grip cavity to prevent dirt, sand, and mud from entering the trigger control components and possibly disabling the weapon. Fits G17/19/22/23/31/32/34/35, with separate models for Gen3 and Gen4 pistols. Gen4 comes with one base insert and 2 tools, one for pistols with backstrap inserts, one for pistols without them. Available in factory polymer frame colors: Black (BLK), Tan. Grav and O.D. Green (ODG).

#### MAJESTIC ARMS RUGER® MARK I/II/III **SPEED STRIP KIT**

32

**Replaces Factory Parts For Fast** Field Stripping & Cleaning

Makes field stripping your Ruger .22 pistol faster and easier by enabling rapid disassembly with a single Allen wrench for routine cleaning and maintenance. Replaces the factory hammer and sticky bolt stop pin that make bolt removal a real chore. Replacement parts are precision machined from high-grade stainless steel to tolerances that meet or exceed the factory parts. Requires no permanent modification to your pistol; gunsmith installation recommended. Speed Strip 3.2 fits any generation Mark series pistol

and features hammer pivot bushing that helps reduce trigger pretravel significantly and allows safe omission of magazine disconnect in Mark III pistols.

SPECS: Stainless steel, natural silver finish. Kit includes replacement hammer and bolt stop pin, plus Allen wrench and illustrated installation instructions. Mark I/II fits Ruger Mark I. II. and 22/45 pistols. Mark III fits Ruger Mark III pistol only. 3.2 Kit includes hammer pivot bushing and fits all Ruger Mark I, II, III, and 22/45 pistols.

#### ED BROWN SMITH & WESSON M&P **PIN SET**

Replace Worn or Damaged Pins OR Just Upgrade To Tighten Up Your M&P's Fit

These hardened stainless steel pins are fully machined on Swiss-type ma-

chines for the ultimate in precision fit (we know what sticklers the Swiss are for precision!). The perfect replacement for the stock roll pins. Proper-fitting pins in your M&P ensure ease of disassembly and reassembly. You're not fighting oversized pins that "don't go gentle" into that good frame OR that leave you worrying they're too loose and will work their ways out as you fire the pistol. Wear- and corrosiion-resistant Black Nitride finish. 1.0 Kit fits first-generation M&P pistols, includes one grooved rear frame pin, one front frame pin. and one trigger pin. 2.0 Kit fits M&P M2.0 models and includes two frame pins and a trigger pin. NOTE: These pins are NOT compatible with variants, such as the Shield, Shield EZ, and Bodyquard,

#### **LONE WOLF** FRAME COMPLETION PARTS KIT for GLOCK®

**Everything You Need To** Turn a Stripped P80 Frame into the Lower Half of a **Complete Pistol** 

Lone Wolf's kit gives you convenient one-stop shopping for all the internal parts you need to turn a bare Polymer80 frame into a completed custom pistol lower half. The kits components are modeled after those used on 3-pin Gen3 Glock® pistols. Instal-

lation is the same as for any factory Glock frame. Each kit contains: trigger housing (with screw & hex wrench), 2 ejectors (separate 9mm and .40 S&W/.357 SIG models), Gen3 trigger bar & polymer shoe, .35 lb. connector, extended slide release lever (black finish), slide stop & spring, 6 lb. trigger spring, trigger pin, locking block pin, and extended magazine catch & spring. Trigger bar is Lone Wolf's own hybrid design that is patterned on the Glock® Gen4 bar but fits Gen3-type frames and produces a slightly shorter pull than a factory Gen3 bar, Trigger assembly includes LW's adjustable trigger stop. Full-Size kit completes any G17-size Poly80 9mm/.357 SIG/.40 S&W

frame. Compact completes any G19-size P80 frame. #100-027-583 ( ) G17 Full-Size Frame Parts Kit,

#### **APEX TACTICAL** FAILURE-RESISTANT EXTRACTORS FOR GLOCK® & M&P M2.0

**Built To Do Its Job EVERY Time - No Failures!** 

Apex's upgraded extractor has a beefedup claw and improved engagement surface geometry to produce more positive, reliable extraction. Less risk of extractor breakage, too. Machined from a solid billet of hardened stainless steel, with a hard matte black finish.

Drop-in replacement parts for factory slides. Glock Gen3/Gen5 fits Gen3 Glock 17, 18, 19 and 34 AND Gen5 G17 and G19, Glock Gen4 fits Gen4 Glock 17, 18, 19 and 34. M&P 2.0 fits Smith & Wesson M&P M2.0 with OR without thumb safety and magazine disconnect. Does not function in original M&P or M&P Shield. All models - extractor spring included. NOTE: Due to variations in manufacturing, this extractor is not recommended for use with aftermarket slides and barrels. Not for use on any Gen Glock Model 26. Not tested for use with any caliber except 9mm Luger (9x19mm).

cases. The Buck Mark is an excellent rimfire

The "Eagle's Talon" is an upgrade part that replaces your Buck Mark's factory extractor to give more reliable, positive extraction of spent

III & 22/45 pistols and 10/22 rifles in .22 LR and .22 Magnum.

#### TANDEMKROSS RUGER® MARK II/III/IV™ "HALO" CHARGING RING

Gives You Extra "Purchase" To Rack the Bolt

The "Halo" is an easy-to-grip pull-

ring that clamps quickly and easily to your Ruger rimfire's bolt "ears" to make charging the pistol easier. With its simple, robust design, the Halo ensures fingers of any size can get the proper purchase on the bolt to cycle it smartly without slipping. Ambidextrous, so left- and right-handed shooters get the same benefit. Makes your pistol look just a bit different from the other Ruger .22s at the range, too, Made of lightweight yet strong aluminum, so it doesn't mess up the gun's balance. Easily mounts to

the bolt with no permanent alterations to the gun. Great for youths, competition shooters, and slightly less young shooters with weak or arthritic hands - anybody who doesn't want to take multiple swipes to charge a round or clear a jam. Fits Mark IVTM/Mark IIITM and associated 22/45<sup>TM</sup> variants.

# SLIDES for GLOCK® 17/19/34

for Better Control

Slides feature a unique wraparound slide serration design that aids in weapon manipulation, especially when checking the chamber. Serrations are cut to the same depth as Glock® factory models to ensure lower slide rigidity. Models are also available with top window cutout between the front serrations. Slides start out as 17-4 stainless steel billet and are machined internally to factory specifications. Slides are compatible with any standard Glock® 17 or 19 components. The factory Glock® rear sight dovetail is machined, with a standard Glock® front sight cut at the front. Heat treated and finished with a matte Black Nitride finish. Factory internal dimensions - so excellent compatibility with factory and aftermarket components. Factory Glock sight cuts. Models for Gen3 and Gen4 pistols. G26 slide accepts Gen1-4 parts; use #100-002-719 recoil guide/spring assembly. All models: dedicated tool required to install of liner; we recommend #777-100-017.

#### BROWNELLS RMR SLIDE for GLOCK®

Stainless Steel Slide With a Bundle of Custom Features

Our RMR Slides for Glock® pistols feature a distinctive,

wraparound serration pattern that aids in manipulating the slide, especially when checking the chamber. (OK, we'll admit it: the serrations look cool, too.) They also come with a pre-cut slot for easy, secure, low-profile mounting of a Trijicon RMR sight, All Front Cut RMR Slides also have standard Glock factory front and rear sight dovetails for "iron" sights. Since the RMR sits low, it can easily co-witness with iron sights. In addition, you can get your Front Cut RMR Slide with an optional "window" cutout on top between the front serrations that reduces weight and enhances airflow to keep the barrel cooler - ideal for hard-working action competition pistols. Each Front Cut RMR Slide starts life as a billet of 17-4 stainless steel that is machined to Glock® factory specifications inside, so it'll fit factory frames and accept factory or aftermarket barrels and parts. Models available for Gen3 and Gen4 pistols, G26 slide accepts Gen1-4 parts; use #100-002-719 recoil guide/spring assembly. All models: dedicated tool required to install channel liner; we recommend #777-100-017.

Available with distinctive top **Window** cutout or traditional solid top. Machined from corrosion-resistant 17-4 stainless steel billet. Heat treated to add surface hardness. Available with three finishes: wear-resistant basic Black Nitride (BLK) finish, as well as a thin, extremely tough, good-looking Bronze or Flat Dark Earth (FDE) physical vapor deposition (PVD) coating. This slide is the ideal upgrade for your factory Glock 17 or 19 pistol - and the perfect top half for a new custom gun built on an 80% frame. NOTE: RMR slides include patented optic cut technology pioneered by ZEV Technologies.

#### BROWNELLS SLIDE BLANKS for GLOCK® 17/19/26/34

A "Blank Canvas" for Your Next **Custom Pistol Masterpiece** 

Brownells Blank Slides for

Glock® pistols come with the exterior left smooth and featureless so you can customize it exactly the way you want it. Add cocking serrations, an optic mounting slot, and cosmetic flourishes to make it entirely your own. (Yes, you will need to bring some machining skills to the table!) Inside, the dimensions fully machined to factory dimensions, so your Brownells Blank Slide for Glock comes ready to fit a factory-spec frame and accept Gen 3 factory and aftermarket barrels and parts. Models for Gen3 Glock® 17, 19, and 34 pistols. G26 model accepts Gen1-4 parts; use #100-002-719 recoil guide/spring assembly. All are machined from firearm-grade 17-4 stainless steel. Comes "in-the-white" so you can apply the finish of your choice. Includes Glock factory front and rear sight dovetails. Sometimes "off the shelf" works, sometimes you want to do it your way. When you're ready to build your own Glock®-platform Dream CumTM reach for a Drawnalla Blank Clide .

Fills the Slot When You Choose To Run Your Pistol Without an RMR Sight

All Brownells RMR-cut slides are designed to have factory-original or compatible aftermarket "iron" (actually plastic) sights installed for co-witnessing with the optic. But what if you want to run your Glock® without the optic? Trijicon designed the sight to be easy to remove – just take out the two mounting screws – so piece of cake. BUT that leaves an open, somewhat unsightly mounting slot in the top of your slide. No problem: simply install this cover plate. Fits perfectly into the slot, anchors down using the same screws that retained the sight, and the top of your slide now has a smooth, finished look. The plate is so neatly contoured to match our slides that it even has the tops of the cocking serrations machined into its sides. It's machined from high-grade aluminum alloy, then hard-anodized matte black to match the color of the slide. If you lost your screw, we sell spares, separately, below. NOTE: Includes patented optic cut technology pioneered by ZEV Technologies. #078-000-413 RMR Slide Plate, 8G22B94......\$ 26.99

#### **BROWNELLS** 19LS **EXTENDED SLIDE for GLOCK® 19**

#### **Build Your Own Hybrid** "Long Slide" Glock®

Brownells offers many innovations for the Glock® pistol, but one of our most novel offerings now gives Glock® fans the ability to mix and match components to create a custom hybrid pistol ideally suited to their personal needs. The Brownells Extended Slide for Glock® 19 enables owners of the

popular G19 pistol to put an extended G17-length slide on their guns. The result is a gun with a longer sight radius - for more accurate shooting - with the G19's shorter frame, making it easier to carry concealed with less risk of "printing" through your clothing. Another enhancement on our Extended Slide for Glock® 19: wraparound, front-cut slide serrations that aid in manipulating the slide, especially for a quick check of the chamber. There are standard, factory-style serrations at the rear. You also get standard factory front and rear sight cuts on your Brownells extended slide so you can install any aftermarket sights that fit a Glock® factory slide.

- Fits Gen3 Glock® 19 frame ONLY
- Machined from hardened, corrosion-resistant 17-4 stainless steel billet
- Tough black Nitride finish with excellent wear resistance
- Accepts standard 9mm internal slide components
- Length: 7.21"
- 12 oz. wt.

Window models have a cutout up front on top that reduces weight and enhances air flow to keep your barrel cool during long practice sessions - plus it gives your pistol a unique, futuristic flair. RMR models also have a pre-cut slot for neat, secure, integrated installation of a Trijicon® RMR red dot sight (mounting screws for sight are even included). Blank slide is unfinished, ready for the skilled gunsmith (or metal worker) to cut slide serrations and other features exactly as needed by you - or your customer. But "custom" work doesn't mean unnecessary work - comes with factory sight cuts. Then it's ready to accept a custom finish; go plain or go wild or something in between.

Note: Due to changes in barrel-to-frame geometry caused by mating the longer slide with the smaller Glock 19 frame, a standard Glock 17 barrel won't work with this slide. Instead, use the Brownells Extended Barrel for Glock® 19 (sold separately, #078-000-383, plain, or #078-000-384, with threaded muzzle).

#### **BROWNELLS** FRONT-CUT SLIDES for GLOCK® 43 & 48

#### Maximize the Performance of Your Pocket Glock® With an Upgraded "Top Half"

With our Front-Cut Slide installed, you'll find your pocket Glock® becomes easier to operate without any change in its reliability or size. The G43's greatest strength is that it lets you carry a pistol with 6 rounds of centerfire punch in an ultra-compact EDC package. The downside is the G43's such a small pistol (barely 6" OAL), you can have trouble

getting a firm grasp on the slide to rack it. And if you're under stress or your hands are wet or a little sweaty... Yeah, even more difficult to jack that first round into the chamber. Our slide gives you up to 60% more grasping surface by adding deep-cut serrations up front that wrap around the top of the slide. (This is also a big help when making a guick press check of the chamber.) The serrations have crisp 90-degree edges that give you excellent purchase, and they're cut to the same depth as the factory grooves - so there's no compromise of the slide's overall strength. These slides are machined from heat-treat hardened 17-4 stainless steel, with hard, wear-resistant matte black Nitride finish. Internal dimensions are identical to factory slides, right down to the factory rear sight dovetail and front sight tenon cut. It will accept both factory "iron" (actually, plastic) sights and any aftermarket sights that fit the factory cuts. This is the bare slide only. You will need to retain your pistol's existing barrel (or an aftermarket upgrade) and recoil guide/spring assembly. You'll also need to install a firing pin. Window model has a .863" x .285" window cut in the top of the slide ahead of the ejection port, in place of the top serrations. This aids in barrel cooling, slightly reduces the weight of the slide for faster cycling, and...well, it just looks cool, too. Shield RMS/RMSc model has a cutout for the super-compact RMS/ RMSc (Reflex Mini Sight/Reflex Mini Sight Compact) red dot reflex sights from Shield Sights. Accommodates the optic the same way the RMR model above does, including retaining the factory sight dovetail/tenon slot. Has front and rear side cocking serrations ONLY (none on top). Mounting screws for sight included. RMRcc model has a cutout for Trijicon's ultra-compact, low-profile Ruggedized Miniature Reflex Sight. Blank slide comes with no cocking serrations or markings. Edges and corners are chamfered. Comes unfinished with fine bead-blasted surface. Also fits G43X and G48. "--- 000 440 CA7 CU-1- .../"|uom" Cimba Cua

#### CZ USA CZ 75 KADET II RIMFIRE CONVERSION UNIT

Turns Your CZ Into A Training Or Plinking Pistol

Complete slide assembly enables the firing of .22 LR cartridges in your centerfire CZ 75. The Kadet is the same size as the centerfire slide, but only the lower third moves, reducing the overall mass but still retaining the

ability to cock the hammer. Slide stop will hold open and release the slide the same as on original pistol. Conversion kit is constructed of forged steel and comes with an adjustable rear sight, plus two 10-round .22 LR magazines. Minor fitting may be necessarv for correct slide-to-frame fit on your

specific pistol. Fits full-size CZ 75, plus these compact/sub-compact models: 75 Compact, P-01, P-06, PCR, and RAMI. Magazines will extend beyond the bottom of grip frame on these models. Kadet will not work on the 97, 75 TS, P-07, or P-09 models.

SPECS: Steel, blued. 8.11" (20.6cm) OAL. 4.72" (12cm) barrel length. 1.1

**CMC TRIGGERS** 

### **KRAGOS RMR-CUT SLIDES** for GLOCK®

Perfect Upgrade for a **Hard-Working Competition** or Daily Carry Pistol

CMC's upgraded Kragos Gen3-type slides provide performance and durability improvements to a factory pistol or a new custom gun built on a Polymer 80 frame. They have a wraparound scalloped serration pattern that greatly improves your hold while manipulating the slide for a presscheck of the chamber or when clearing a malfunction. The 45° chamfered edges ease holster ingress and egress and resist snagging on other gear. These Gen3 slides have standard Glock® sight dovetails equipped with Tritium night sights. There's also a pre-cut optic mounting slot (cover plate included) for red dot pistol optics that fit the RMR footprint, including the original Trijicon RMR reflex sights, as well as sights from Holosun. Kragos slides accept factory or aftermarket barrels and parts, making them an excellent upgrade for a factory Gen3 Glock®. They are machined from 17-4 stainless-steel billet to tighter tolerances than the factory slides for more consistent barrel lockup, which improves accuracy potential. They are heattreated to H900 Rockwell "C" 42-44 for extreme wear resistance and coated with a Diamond-Like-Carbon (DLC) finish for superb corrosion resistance. DLC coatings exhibit a desirable combination of low friction coefficient and high micro-hardness, making it the perfect finish for high wear applications like pistol slides. **NOTE:**Channel liner is required for these clides available separately.

Charmet timer is	required for these silves, available separat	cty. ===

#### ALPHA SHOOTING SPORTS -**ALPHA MARKSMAN V4 SLIDE** for GLOCK® 21

**Enhanced RMR-Ready Slide for Big Bore Custom Pistols** 

The Alpha Marksman V4 slide is the perfect upgrade for a Gen3

Glock® 21 or a pistol built on a Polymer80 PF45 frame. It comes with a built-in mounting slot for a Trijicon RMR or Holosun 507 red dot sight (or other brand that uses the RMR mount), plus deep, gnarly front and rear cocking serrations AND window cutouts on the sides and rear for weigh reduction - and let's admit it, a badass look that'll show off your pistol's aftermarket barrel. It is machined from 416 stainless steel for strength and near-imperviousness to corrosion and given a tough Black DLC PVD finish. Includes rear sight dovetail

and hole for front sight tenon. Cover plate for the RMR slot is included. .639" dia. muzzle hole.

V2 Texture Pattern

#### Better-Than-Factory Tolerances for Tight Lockup; **TWO Unique Texture Patterns**

All Grey Ghost Precision slides are stripped slides machined from billet 17-4 stainless steel alloy to much tighter tolerances than factory slides. The optic-mounting slot is a new "dual" design compatible with both Leupold DeltaPoint Pro or Trijicon with supplied shim plate (correct length screws included). A custom G10 cover plate is included, with proper screws for the cover plate, as well. (Sorry, not for Vortex or Surefire red dot sights). The finish is a uniformly lustrous, marvelously wear- and corrosion-resistant Black Nitride. We are offering these slides in two of GGP's unique exterior texture patterns, both of which give you an excellent, non-slip grasp for manipulating the slide and operating your pistol efficiently. They are also exceptionally badass looking! **V2** is a golf-ball-dimpled pattern that GGP calls "Geoscale." V3 has distinctive front and rear ser-

rations that get	deeper toward t	he top of th	ne slide. 💻

#### **GREY GHOST PRECISION SIG SAUER P320 & P365** GGP320/GGP365 SLIDES

GGP365 V2 (sight not included)

GGP365 V1

A Top-Half With Ergonomic & Optic-**Mounting Enhancements** + Multiple Texturing Options

With the adoption of the SIG P320 by the U.S. military, as well as many law enforcement agencies, both it an SIG's other modular pistol, the P365, have earned increased attention from custom pistolsmiths. These slides offer enhanced ergonomics with improved grasping

surfaces and cocking serrations AND the flexibility to mount a Trijicon RMR, SIG Romeo1, or Leupold Delta Point Pro red dot sight right out of the box without resorting to bulk adapter plates that complicate installation (all screws and shims included) and raise the optic needlessly high above the bore axis. OK, we'll admit it: the GGP slides also add a little aesthetic flair to the P320's sober exterior. They are machined from 416 stainless steel to tighterthan-factory-tolerances and come with a tough DLC ("Diamond Like Coating") finish. There's a G10 glass fiber laminate cover plate for the optic slot because factory dovetails for "iron" sights are included - a co-witnessed backup for the optic. Drop-in installation on SIG P320/P365 grip modules. Stripped slide - no barrel or other internal components included. Different external texturing patterns to choose from: GGP320 V1 with aggressive serrations and window cuts; GGP320 V2 with checkered texturing and no window cuts; GGP365 V1 with aggressive front and rear serrations; GGP365 V2

#### Field-Stripping A truly plug-n-play upgrade for your H&K

**HECKLER & KOCH -**

**VP9 OPTICS-READY SLIDE** 

pistol! The VP9 OR slide easily converts a standard VP9 or VP9-B into an optic-ready pistol. This kit includes cocking supports, complete firing pin assembly, extractor assembly, cover plate for the optic cut, plus front and rear suppressor-height sights. The deeply serrated all-black rear sight contrasts well with the front Tritium night sight. These sights are specifically designed for lower 1/3 co-witness with a mounted RMR. Install your existing barrel and recoil spring, and this slide is complete and good to go. Fits all VP9 full-size frames. both standard and button mag release type. The Optics-Ready Long Slide Kit gives that VP9/VP9-B a longer 5" barrel and longer sight radius - if you're sticking with the irons on board. But at the rear of the slide there's a milled cutout compatible with H&K's Optic Plate System designed to mount most of today's popular red-dot sights. In addition to the extra barrel length, the barrel has an O-ring that enhances lockup for improve accuracy potential. Weight-reducing cuts on the slide speed up cycling for greater reliability and shortened

cycle time, so you can speed up those splits faster than ever! The long slide kit includes the slide, barrel, guide rod/recoil spring assembly, suppressor-height sights, and all the necessary internal parts.

#### **TRUE PRECISION** GLOCK® G43 & SIG P365 **AXIOM SLIDES**

Upgraded Exterior Texturing PLUS Optic-Mounting Capability

True Precision's Axiom slide is 100% designed and manufactured in the United States of America, machined from a solid billet of 17-4PH certified stainless steel, heattreated for perfect hardness,

the way a top-of-the-line pistol slide should be! These stripped slides come pre-cut with mounting slots for these popular lowprofile red dot holographic sights: Shield RMSc and SIG Romeo Zero. They'll accept the Holosun 507K, too, with minor modifications. They include an anodized aluminum (not plastic) cover plate to install when you're running solely with "iron" sights. These slides have attractive side- and top-cut windows, with angled rear serrations and "aggressively reduced" scalloped cuts on the front. All together, the texturing pattern gives you an excellent purchase on the pistol to rack the slide, clear jams, and wrangle is efficiently into

its holster. 📒		-

#### BROWNELLS **CHANNEL LINER + TOOL** for GLOCK®

REQUIRED Part When You're Completing a Stripped Slide - Plus the Tool for Installing It

If you've spent any amount of time upgrading a Glock with an aftermarket slide - or building a whole pistol on an 80% frame - you know you usually have to install the channel liner that the firing pin spring rides in. You pretty much gotta have the channel liner tool to install it, except.... where did you put it? We've solved the problem by selling the liner and the inexpensive little tool together, kinda like an IKEA-style furniture kit that comes with the Allen wrench you need to put it together. Save the tool for the next time you need to install the channel liner. Or just buy another one of these kits when the time comes! NOTE: This channel liner fits all Glock® pistols except the G43, G43X, and G48.

#078-000-649	Channel Liner & Installation Tool,
	9B4D99

#### **CROSS ARMORY** SLIDE PARTS KIT for GLOCK®

All the Small Parts Packaged Up & Ready To Go Into Your Pistol

The Cross Crew has conveniently assembled a kit with all the small parts needed to turn a

bare, stripped slide into a complete "top half" ready to go on your factory Glock or finished 80% frame. Oh, except for one item: it does not include the barrel (but we offer plenty of those, sold separately). Also, the kit's guide rod is stainless STEEL, not plastic like the factory rods, and the cover plate for the back of the slide is anodized ALUMI-NUM, not plastic. Kit contents; recoil spring assembly with stainless steel quide rod, stainless steel firing pin, firing pin spring & spring cups, spacer sleeve, firing pin block, firing pin block spring, extractor, extractor depressor plunger, spring-loaded bearing, aluminum slide cover plate, and the channel liner.

#### ED BROWN SMITH & WESSON M&P SLIDE REBUILD KIT

Critical Small Parts for a Proper Rebuild of "1.0" AND M2.0 Slides

A great way to refresh and old warhorse to be good as new! Like the original revolver

it's named after, the Smith & Wesson M&P pistol is a hard-working gun designed to be shot - and shot a LOT! That means they do wear out over time, but they're so robust it's simply a matter of rebuilding them rather than replacing them. Ed Brown's handy kit contains all the really hard-to-round-up S&W factory OEM internal parts to rebuild an S&W M&P or M&P 2.0 slide. Kit includes striker assembly, striker block plunger, striker spring guide (red sleeve for 2.0 & white sleeve for "1.0"), striker block spring, striker block spring spacer, slide backplate, extractor spring, and extractor pin.

# FORWARD CONTROLS DESIGN OPF-G OPTIC PLATFORM for GLOCK® MOS

A Significant Upgrade on Glock's Modular Optic System for Rock-Solid Red Dot Sight Installations

The Glock Modular Optic System (MOS) concept is great, even if the factory MOS adapter plates could use some help. The Forward Controls crew de-

signed their OPF-G (Optics Platform, Glock) in collaboration with U.S. Marine Corps combat veteran and former USMC Shooting Team head coach, Tom Shields. They used Glock's MOS adapter plates as a basis and designed their version of what they think it should and can be. Standards, commonality, availability of parts are all good things, but until now users had to send in their slides to be milled to accept mini red dot sights, or had to opt for third-party optics-ready slides. The time it takes to send in the slides to be milled, and varying quality of the milling work, as well as variations in aftermarket optics-ready slides resulted in a lack of consistent standards in sight height. Glock's MOS may not sit as low as some, but the folks at Forward Controls believe what the MOS offers more than makes up for it - namely, a uniform sight height, ease of installation, parts commonality and availability.

The OPF-G is machined in steel and fully supports the sight at the front and rear with recoil lugs/fences to ensure minimum movement - as close to none as the laws of physics on a reciprocating slide allow. The OPF-G eliminates the need for an additional sealer plate. It has correct-length sight-to-plate, and plate-to-slide Torx screws. Screws are to be Torx. The OPF-G's thickness is identical to that of the Glock MOS plate, so it doesn't change the sight's mounted height, nor does it require different iron sights. Comes with plate to slide screws (M3-0.5mm x 6mm, same as what Glock MOS plates uses), and sight to plate screws (% x %), a T10 key and a VC3 packet.

RMR model is an MOS Adapter Set 01 and Set 02 compatible plate for mounting Trijicon RMR or SRO on Glock Gen 4 and Gen 5 slides on the G17, G19, G34, G35, G41 (width 25mm/1 inch.), and G40 that uses Set 02. The OPF-G RMR is wider than the factory MOS plate to fully support the RMR, thus it is compatible with all MOS equipped Glock slides. DPP model for Leupold DeltaPoint Pro is compatible with Glocks that use Glock's Set 01 plates (17, 19, 22, 23, 26, 34, and 45). G40 (10mm) uses Set 02 plates that are slightly wider, while OPF-G DPP still works with it, it will not completely fill the slot width wise. RMRcc model is designed for use on Glock Set 01 compatible slides, but not the slimline Glock 43X and 48. ACRO model is an MOS Set 01 compatible plate for mounting Aimpoint's ACRO P1 and P2 on Glock Gen 4 and Gen 5 slides, G17, G19, G34, G35, G41 (width 25mm/1 inch.) It is incompatible with G40 that

uses Set 02.

# COVER PLATE for GLOCK®

Durable Replacement To Factory Part Easy, Drop-On Installation

Cover plate personalizes the look of your Glock and replaces the plastic, factory part for added strength. Installs and removes more easily than the factory cover plate for maintenance access.

Glock Slide Completion Kit

Handy Kits To Finish Fitting Out a GLOCK® or SIG P320 Slide

GGP's slide parts kits include all of the internal small parts needed to turn a stripped slide into a complete

assembly - minus the barrel -or to refurbish a tired factory original slide. **Kit for Glock**® fits factory G17/19/26/34 Gen1-4 slides, as well as Grey Ghost's 9mm GGP-17/19 slides. Bonus upgrade: the striker, extractor depressor plunger, striker safety, and extractor are all machined from 17-4PH stainless steel bar stock for unmatched strength and reliability. Complete Glock kit contents: striker, striker safety, 5.5 lb. striker safety spring, 9mm extractor, extractor depressor plunger & spring, 6061 T6 aluminum back plate, striker channel liner, striker spacer sleeve, striker spring cups (2), and extractor depressor plunger bearing. **SIG P320 Kit** is compatible with SIG Sauer factory full-size, compact, and carry slides, as well as Grey Ghost's 9mm GGP320 full-size and compact slides. Includes striker assembly, extractor, extractor pin, extractor spring, extractor pin plug, and

### LONE WOLF SLIDE COMPLETION KIT for GLOCK®

All the "Guts" To Complete a Stripped Slide (Except Barrel)

The complement to Lone Wolf's Spectre receiver completion kits, this kit contains all the necessary parts to complete the inside of a stripped Glock\* slide, minus the barrel. This is a must-have item for

any custom build involving an aftermarket slide, including an all-new custom pistol built on one of the popular 80% frames. Includes channel liner, spacer sleeve, marine spring cups, mid-weight striker spring, striker, LCI extractor, spring-loaded bearing, depressor plunger and spring, firing pin safety and spring, and slide cover plate. Kit does not include recoil spring, barrel or sights.

# RIVAL ARMS SLIDE COMPLETION KIT for GLOCK® 17 & 19

ALL the Small Parts To Complete a 9mm Slide

> The devil is in the details! A great slide is critical to any great custom pistol, so it is important to finish that slide with high-quality components. In-

stead of sourcing every part individually, Rival's slide completion kit contains ALL of the parts - including the back plate - needed to assemble the internal workings of a slide for your Gen3 or Gen4 9mm Glock®, minus only the barrel and guide rod/recoil spring assembly. These parts are manufactured to factory tolerances or tighter. Highstress parts are machined from billet stainless steel, and parts with friction points have a PVD coating. Fits Gen3 and Gen4 G17, G19, G26 and G34 only.

# STRIKE INDUSTRIES SLIDE PARTS KIT for GLOCK®

Factory Part Fit & Reliability With Critical Components Made from BETTER Than Factory Materials

All the parts to finish a stripped slide, minus a barrel and sights. Manufactured to the exact same specifications and

tolerances using the same or better materials as original Glock® factory parts. Firing pin is MIM 17-4 PH stainless steel hardened to H900 condition, with a tough anti-corrosion/wear Black Nitride finish. The critical firing pin safety and extractor depressor plunger are made of 4140 carbon steel hardened to Rockwell "C" 42-46. Complete contents: recoil spring assembly, firing pin & spring, firing pin spacer sleeve, firing pin spring cups, firing pin channel liner, extractor depressor plunger & spring, spring-loaded bearing with loaded chamber indicator (LCI), firing pin safety & spring, extractor with LCI, and slide cover plate. Fits Gen1 thru Gen3 pistols.

# POLYMER80 SLIDE PARTS KIT for GLOCK®

Polymer80's kit contains all the small internal parts you need just add sights and a barrel of your choice - to turn a stripped P80 or Glock® factory slide into a complete "top half" for a pistol. But this kit is not just a set of generic, workaday parts! These parts are engineered for strength, resistance to wear, and smooth operation. It includes Polymer80's slide PF-Series™ striker, made of 17-4 PH stainless steel so it'll survive the Apocalypse (or a least sending off a very large number of rounds down the barrel). Made of the same hardened stainless steel alloy to ensure smooth operation are the 9mm extractor, extractor depressor, and striker safety. You also get an upgraded cover plate, not of plastic but of durable machined 6061 T6 aluminum alloy. There's a complete suite of PF-Series high-end stainless steel springs, too: 5.5 lb. striker spring, extractor depressor spring, and striker safety spring. Unlike other "complete" kits, P80's kit even includes the channel liner, striker spacer sleeve, striker spring cups (2 of 'em, of course), and the extractor depressor plunger bearing. All critical parts are machined from break- and wear-resistant 17-4PH stainless steel. This kit fits Polymer80 slides and Gen1-4 Glock® 17, 19, 26 and 34 factory slides. To give your pistol an extra touch of visual distinctiveness, this kit sports a twotone red-and-black color scheme that'll make your pistol look as good as it shoots!

ŠPECS: Complete list of parts: striker, striker spring (5.5 lb.), striker safety (6 spring), striker spacer sleeve, striker spring cups (2x), extractor, extractor depressor (θ spring), extractor depressor plunger bearing, rear cover plate, and channel liner.

# ZEV TECHNOLOGIES ALUMINUM SLIDE BACK PLATE for GLOCK®

Stronger Than Factory Part - Golfball Pattern Gives Your Pistol a Unique Look

A standard-sized Glock® slide backplate with a unique dimpled pattern - kinda like golfball dimples - that gives your Glock a subtly different look. Made of hardcoat anodized aluminum, so it's

subtly different look. Made of hardcoat anodized aluminum, so its substantially sturdier than the plastic backplate that came with your pistol from the factory.

#100-019-677 Aluminum Slide Back Plate, 8B18K05 ... \$ 19.00

# STIRKE INDUSTRIES GEN3 TO GEN4 SLIDE ADAPTER PLATE for GLOCK®

Helps You Get a Secure, Gap-Free Fit of a Gen3 Slide on a Gen4 Frame

Handy little part enables you to operate a Gen3 slide on a Gen4 frame. The Slide Adapter Plate helps you take advantage of the huge abundance of aftermarket Gen3

slides without being restricted by slide-to-frame fit problems. A Glock® factory or aftermarket Gen3 slide will usually fit and function on a Gen4 frame, but there will be an unsightly gap, and excess flex in the frame because of the large hole. Install the SAP in seconds to prevent ANY movement of the Gen3 guide rod/recoil spring from possibly damaging your gun. Basically, the world's your oyster, with no restrictions in form OR function, when it comes to fully customizing your Perfect Pistol with the exact slide you want.

#### AGENCY ARMS MATCH-GRADE BARRELS for GLOCK® PISTOLS

A Drop-In Upgrade - The Quickest Way To Improve the Accuracy Potential of Your Pistol

If you can break down your pistol for cleaning, then you can install one of these drop-in ready, match grade barrels. Machined from 416R stainless steel, with pulled broach rifling and a 1-10" rifling twist. Mid-Line Barrels have a fluted exterior

Mid-Line Non-Threaded w/TiNi Finish

for enhanced cooling during those long range sessions. Separate models for **Gen1-4** (where applicable) and **Gen5** pistols . **Syndicate** 19 barrels fit Glock® 19 Gen1-4 slides. These are the same barrels as used in Agency's Syndicate pistol kits. Non-Threaded (NT) barrels sit flush with slide and feature a deep beveled crown to protect the rifling. Threaded (Th) models come with ½"-28 threads and protector. Barrels are finished in natural Stainless Steel (SS), Black DLC (Diamond-Like Carbon), or Gold Titanium Nitride (TiNi).

#### **APEX TACTICAL FN 509 DROP-IN THREADED BARREL**

Put a Comp or Silencer on Your 509

This is a direct, swap-in barrel that you install simply by field-stripping your pis-

tol and reassembling it with Apex's new barrel. 1/2"-28 tpi muzzle threads are ready to accommodate standard muzzle devices. Undercut thread intercept accommodates a wide variety of attachments. Manufactured from premium-quality cold hammer-forged stainless steel blanks, with the 1:10" rifling twist rate that works best with 9mm Luger ammo. Tough Black Melonite finish resists wear and corrosion FAR better than traditional bluing. Thread protector

#### APEX TACTICAL SMITH & WESSON M&P **DROP-IN STAINLESS STEEL 9MM BARRELS**

Swap your 9mm M&P's factory barrel for one of these and enjoy an immediate jump in accuracy and performance. The folks at Apex

Tactical have engineered a barrel capable of shooting groups as small as a  $1^{1}/2^{\circ}$  at 25 yards. These 9mm barrels have a 1-10" twist and are available in various lengths. We're some of them "Semi Drop-In" replacements for the factory barrels because they MAY require some minor fitting. Threaded models maintain the same features and also have an extended muzzle with 1/2"-28 tpi threads to accept a compensator or sound suppressor. Screw-on thread protector included. M2.0 4" fits ONLY an M&P M2.0 Compact model that came with a 4" factory barrel. Black Melonite anti-wear/corrosion finish. Should be a true "drop-in" requiring no fitting.

#### BROWNELLS MATCH-GRADE BARRELS for GLOCK®

A Premium Barrel for Custom Builds or Upgrading a Factory Pistol

One of our match-grade barrels is an excellent replacement for a shot-out factory

barrel or for completing a custom pistol based on the Glock® platform. They are the ideal tube for a custom gun built on a Polymer80 frame with an RMR on top! Our barrels are machined from hardened 416R stainless steel to precise dimensions for a tight lockup and long service life. Drop-in fit on most guns. The extra-hard Black Nitride finish resists surface wear and stops in its tracks whatever corrosion might try to challenge the stainless steel. All barrels come with standard, 1-10" right-hand, 6-groove rifling that is compatible with "practice" ammo with non-jacketed bullets. Available with either a plain muzzle crown or Threaded to enable installation of a compensator or sound suppressor. Each is laser engraved with the chambering and the Glock model it fits. We also offer 9mm Conversion barrels for the G22 and G23; switch your pistol from .40 S&W to 9mm Luger simply by swapping the barrel and magazine.

**BROWNELLS** PISTOL BARRELS

barrels enable you to restore the accuracy of pistols with shot out barrels, without going to a gunsmith. These barrels, including the models for Glock® pistols have conventional rifling with a 1-10" twist to handle cast lead or jacketed bullets with accuracy. Machined from 416-R stainless steel, these barrels are nitride treated inside AND out for corrosion resistance and longevity. An 11° target crown pro-

tects the end of the rifling from accuracy-compromising damage. Threaded muzzle models available with 1/2"-28 tpi threads. These

barrels are ready-to-install in your pistol, with no additional fitting

#### BROWNELLS **19LS EXTENDED BARREL** for GLOCK® 19

Correct Barrel for Your Custom G19 With Extended Slide

The Brownells Extended Barrel for Glock® 19 is designed to

work hand-in-glove with our extended slides for the popular compact 9mm pistol. Due to changes in the slide-to-frame geometry caused by mating the long slide on the compact Glock 19 frame, a factory Glock 17 slide will not work with our slide. This extended barrel is correctly configured to ensure that your new "long slide" G19 functions perfectly. This extended barrel and the slide work together to give you a longer sight radius for more accurate shooting and better recoil control - and a pistol that's more comfortable to shoot all around. Our Extended Barrel for Glock 19° is available with a Plain muzzle or Threaded (1/2"-28 tpi) to accept a compensator or silencer. Easy drop-in installation. Corrosion-resistant 416R stainless steel with durable black Nitride finish for excellent resistance to surface wear. 1-10" right-hand 6-groove rifling. Threaded model has ½"-28 muzzle threads. These barrels are precision machined to ensure an exact fit to drop right into your pistol's extended slide and preserve the superior reliability and performance your expect from your Glock® 10

#### **GLOCK® FACTORY** THREADED BARREL FOR G44

The Barrel You Need To Mount a Suppressor on Your Rimfire Glock®

Convert your .22 LR G44 to mount a sound suppressor with this factory original, drop-in threaded barrel. The muzzle has European M9 x .75 RH threads, but a 1/2"-28

tpi adapter is included to enable the installation of a wide array of American-spec muzzle devices that accept suppressors. There's also a thread protector for times when you want to shoot your G44 unsuppressed. Note: this barrel will fit ONLY the Glock 44.

#100-039-733 G44 Barrel, 1/2"-28 Threaded, 1D177H14.....\$ 194.99

#### **BARREL FITTING**

All custom aftermarket barrels will need some fitting. The amount required will depend on the tolerances allowed by both the barrel and slide makers, as well as the frame of the pistol. Some barrels may need the chamber cut to full depth after the barrel has been fitted. We carry a wide variety of files and stones to help with the fitting, and chambering reamers from Clymer and Manson Precision.

#### **FAXON FIREARMS MATCH-GRADE 9MM PISTOL**

BARRELS

**Tight, Slop-Free Fit** for Superior Accuracy Potential

A great starting point for your next custom build, or just a refresh of a gun with a shot-out barrel, these drop-in barrels are carefully engineered, meticulously machined, and exhaustively tested to provide top-notch performance. Machined from triple stress-relieved, GBQ 4150 carbon steel for a tighterthan-OEM fit, these barrels deliver a more precise lockup with a greater accuracy potential. Barrels have an 11° target crowned muzzle to en-

sure the bullet stays on a true trajectory and are available with either a standard muzzle or with 1/2"-28 tpi muzzle threads. The SAAMIspec chamber and 1-10" twist conventional rifling readily handles any type of projectile - jacketed, heavy subsonics, even cast-lead practice bullets. Choose from a Plain barrel, a traditional Straight Fluted barrel, or for some models a Flame Fluted barrel that not only dissipates heat guicker, but it adds an ultra-radical look to your gun. These show-stopping barrels have a hard, black Nitride finish for superb resistance to corrosion and surface wear. Black Nitride finish is standard. Some models also available with golden-hued **Titanium** Nitride (TiN) or multi-colored Chameleon that changes color in different light. Barrels for Glock® fit Gen1 through Gen4 pistols. Models also for SIG Sauer D320 and D365 and Smith & Wasson M&D M2 0

# **GREY GHOST PRECISION**

#### **SIG SAUER P320** MATCH-GRADE BARRELS for GLOCK® & SIG P320/P365

Upgrade Barrel Helps Make Your Pistol as Accurate as It Is Reliable

Glock and SIG Sauer make excellent pistol, but like all factory guns, their performance can be more fully realized with aftermarket upgrades. Grey Ghost's

drop-in match-grade barrels help extract the last bit of accuracy potential from these fine pistols. They're machined from 416R ordnance-quality stainless steel with final dimensions kept to tolerances of +/- .003" for maximum consistency. SAAMI-spec 9mm match chambers and 1-10" (SIG) or "proprietary twist rate" (Glock - hey, as long as it works!) rifling to ensure stable flight of just about any available 9mm bullet. Tough Black Nitride finish resists surface wear. GGP recommends using only brass-cased, factory-loaded ammunition.

#### GRIFFIN ARMAMENT ATM BARRELS WITH MICRO-CARRY COMP

**Superbly Precise** Match-Grade Barrel With Compensator.... for Your Daily Carry Gun

Griffin's ATM (Advanced Threaded Match) Barrels are

billet machined from pre-hardened 416R stainless steel to exacting tolerances for the ultimate combination of match-grade performance and drop-in installation. Five-axis machining is done in a single work holding positions all critical dimensions on the breech ensuring theoretically perfect geometrical relationship of barrel, slide and locking lug. Chambers are honed and polished to ensure an extremely smooth surface finish and optimal reliability with a wide range of ammunition from training to duty ammo. The result is the best possible accuracy without sacrificing factory reliability. Designed with concealed-carry users in mind, these barrels provide uncompromising reliability. They also come with Griffin's Armament's Micro Carry Comp (MC<sup>2</sup>) installed. The MC<sup>2</sup> combines a substantial reduction in felt recoil in the most compact of packages. It resists printing through clothing while carrying concealed and fits holsters without modification. The MC2's miniature and lightweight package has near zero effect on the handling and storage of the firearm. All barrels are stress-relieved and have a honed and polished SAAMI-spec chamber, broach-cut rifling, target crowned muzzle, 1/2"-28 tpi muzzle threads, and a durable matte Black Nitride

finish. 📒

#### LSP HIGH STANDARD MATCH BARREL

Replace Worn Or Shot-Out Barrels With Accurate, Match-Quality Models

Precision-machined from Douglas Premium blanks and cut with a special match chamber. Two models: Match Bull Barrel is fullcontour for greater forward weight, adds the "muzzle-heavy" feel. Match Aluma-Lite Barrel features a turned down forward section that's sleeved with aluminum to help compensate for the weight of red-dot optics or a scope. Both feature a recessed target crown and are pre-drilled to accept the LSP Scope Mount listed elsewhere. Fits push-button, take-down models of High Standard.

SPECS: Steel, polished blue or matte silver finish. Chambered .22 long rifle. 5<sup>1</sup>/<sub>2</sub>" (14cm) long, .90" (22.8mm) diameter. **Bull**; 14.6 oz. (414 g), Aluma-Lite; 9.7 oz. (274 g) wt.

#### **SILENCERCO** THREADED PISTOL BARRELS

**Equips Your Pistol To Accept Your Sound** Suppressor of Choice

The only thing better than a normal pistol barrel is a threaded pistol barrel with a silencer on the end. These SilencerCo barrels replace your pistol's factory pipe to set it

up for suppressor use. Each barrel is threaded with the thread pattern most commonly found on suppressor for that particular gun's caliber. Barrels are precision machined from ordnance-grade 416R stainless steel to ensure a long service life and a proper, drop-in fit to their corresponding pistols. A tough matte black nitride finish protects the barrel surface from wear; some models also available with the steel's natural silver finish. All in all, SilencerCo's barrels are tough enough to hold up to the harshest operating conditions - and plenty of rounds down range, Glock barrels will fit both Gen3 and Gen4 pistols. Glock 43 barrel includes piston.

SPECS: 416 stainless steel, black nitride finish.

# RUGER® SR22® THREADED BARREL KIT

Converts Your Plain-Barrel SR22 To Take a Compensator or Sound Suppressor

Drop-in barrel with ¹/²²-28 tpi threaded muzzle lets you quickly convert your plain-barrel SR22 to accept a sound suppressor or compensator for quiet, comfortable range time fun. This is a genuine Ruger® factory part, so you know it's going to fit and function correctly in your SR22® without fiddling and mods. Installation is easy: field strip the gun, remove the old barrel, and insert this one. Threaded muzzle accepts any ¹/²-28 muzzle device, including the Ruger® Silent-SR™.

**SPECS:** Machined stainless steel. Fits SR22 pistols with serial numbers 361-7XXXX and higher. Thread cap, adapter, and wrench included.

WILSON COMBAT -

MATCH-GRADE BARREL for GLOCK®

# LONE WOLF ALPHAWOLF BARRELS for GLOCK®

Upgrade Your Glock To Shoot Lead Bullets; Threaded Muzzle & Caliber Conversion Models, Too!

Match-grade 416 stainless barrels are manufactured for a tighter fit than the factory barrel for improved lockup and greater potential accuracy from your standard-frame Glock. Conventional, broach-cut rifling allows you to shoot cast lead or jacketed bullets in these barrels without the lead fouling problem associated with the originals. All barrels have an improved feed ramp

design and the fully supported chamber helps prevent case failures. Both the feed ramp and chamber have been polished for reliable feeding and extraction. May require minor fitting. Threaded muzzle models give you a place to hang your favorite sound suppressor or recoil compensator. Thread protector included. Conversion barrels let you shoot a different cartridge in your Glock without having to buy a whole new gun. To complete the conversion, you will need to use magazines designated for the cartridge you are converting to. So a .40 S&W to 9mm conversion will require you to use Glock 9mm mags in the modified gun (but who doesn't have a bunch of those sitting around? - if not, we have plenty elsewwere in this catalog).

#### TRUE PRECISION DROP-IN BARRELS

Make Your Pistol
"True" to Its Full

"True" to Its Full Poential By Upgrading Its Barrel

These easy to install drop-in barrels are engineered for improved accuracy potential with a

better overall fit than the factory barrels, plus added chamfers, improved radius cuts, and other additions for a better fit and smoother operation. They have a fully supported SAAMI-spec chamber and broach-cut 6-groove rifling that enables you to safely shoot ALL types of ammo in your pistol, even inexpensive practice ammo with cast lead bullets. Machined from USA-sourced 41GR stainless steel with standard 1:10" rifling and a special 11-degree target crown (non-threaded models) or ½"-28 tpi threads for mounting a compensator or silencer. Threaded models come with a thread protector with Viton high-heat integral O-ring lock for a secure fit. Available with a natural Silver finish, extra-tough Black Nitride, or super-wear-resistant Titanium Nitride (TiN) with an aesthetically pleasing gold color.

# ZEV TECHNOLOGIES OPTIMIZED MATCH BARRELS

for GLOCK®

Sure, They Look Unique, But You Can't See What Really Makes Them Cool

Zev's Optimized Match barrels are all about performance. Every barrel is cut-rifled, inspected for groove dimensions, then double honed (rough and finish) until a minimum surface finish

of 16 RA is reached. Enhancements over factory barrels include a recessed target crown, a precise-dimensioned match chamber, and a stylized barrel hood with caliber and model engravings and a loaded chamber indicator. Zev's proprietary broach-cut 1-14" lefthand twist rifling was developed to create the most accurate Glock aftermarket barrel available on Planet Earth (we can't vouch for elsewhere in the universe), and testing confirms a significant increase in accuracy over factory barrels in all standard bullet weights. Barrels are machined from 416R stainless steel which is an ideal material for making match-grade barrels because the material holds dimensions, so it allows for the precise cutting of chambers and rifling which results in a more accurate barrel. The golfball-like dimpled texture? Provides more surface area to help dissipate heat faster to combat group-shift caused by overheating of the barrel. And it looks cool, too. Available with a tough **Black DLC** (Diamond-Like Carbon) finish or a pleasant-looking Bronze PVD finish. Threaded models

	eads and include a handy thread protect	or. 💻

# ZEV TECHNOLOGIES SIG P320 / P365 - Z320 & Z365 PRO BARRELS

A Drop-In Match-Grade Barrel for Your Modular SIG

ZEV's Pro series barrels bring to SIG pistols the same virtues their Pro-Match barrels gave to the Glock® 19 (see separate listing). They deliver all the Good Stuff you want:

easy, drop-in installation, extra-precise dimensions, a streamlined hood for extra-tight lockup, the Dimples, and a tough Black DLC (Diamond-Like Carbon) finish that lowers surface friction for enhanced reliability, while it wards off premature surface wear and corrosion. The cool appearance is a bonus (no extra chargel). Drop one into your SIG to be on the fast-track to a high-performance pistol that looks AND performs like it belongs on the race-gun circuit.

# ZEV TECHNOLOGIES PRO MATCH-GRADE BARRELS for GLOCK® 19

A Drop-In Accuracy Boost for Your G19

Zev's drop-in Pro Match barrels give an instant upgrade to the accuracy potential of any Gen1 thru Gen5 G19 pistol. They are machined from pre-hardened 416R chromium stainless steel that was originally developed for use in match-grade rifle barrels. This material provides high tensile strength and toughness to with-

stand typical chamber pressures while still being highly corrosion resistant. Every barrel is double honed (rough and finish) until a minimum surface finish of 16 RA is reached. During this process the barrels are held to a final dimension of +/- 0.003\* for consistency and accuracy. The barrels are cut rifled (1-10\* twist) and 100% inspected for groove dimensions and broach finish. SAAMI-spec match chambers. Zev's streamlined hood design helps ensure tight lockup and smooth barrel movement as the slide cycles.

# TACTICAL SOLUTIONS BROWNING BUCK MARK TRAIL-LITE BARRELS

Gives The Benefits Of A Bull Barrel Without The Extra Weight

Offering improved balance and superior accuracy, the lightweight Trail-Lite barrel replaces the factory barrel on your Browning Buckmark with no gunsmithing required. Button rifled aluminum barrel has a chrome-moly steel liner to enhance accuracy. Comes with target front sight installed, and pre-threaded muzzle to accept the Tactical Solutions compensator listed below or another '/-2" - 28 tpi threaded muzzle accessory. Includes muzzle thread protector for clean, finished look if compensator isn't installed.

SPECS: 6061 T6 aluminum, hardcoat anodized, black or O.D. green, matte finish. Chrome-moly steel liner with 1-16\* twist rifling. 9\* (2.3cm) O.D. Installation instructions included. 4" – 4.7 oz. (133g) wt. 5½" – 5.6 oz. (158a) wt.

### CGS SUPPRESSORS QUBE COMPENSATOR for GLOCK®

Recoil? What Recoil?

The way the compact Qube™ Compensator blends neatly with the blocky Glock slide is frosting on the cake. What really takes the cake is how easy the Qube is to install and "time" correctly! The Qube™ provides effective mitigation of felt recoil and counteracts muzzle

rise, making your pistol both easier to control and faster to get back on the target after each shot in a string. The Qube™ actually comes in two pieces, the comp itself and a mount that attaches to the barrel simply, via a lock nut. The Qube™ body slides over the mount and shoulders against a taper. The lock nut threads onto the compensator mount and pinches the body against a second taper and locks it down which prevents rotation. The Qube is also ultra-compact, making it ideal for an EDC/every day carry pistol: 1.25" x 1" wide x .825" high. Machined from 17-4H900 stainless steel, with a durable Black Nitride finish. Fits Glock® pistols with 9mm barrels only. ■

#100-034-507 Qube Comp 9mm, Black, 1F119K69... \$ 132.99

# GRIFFIN ARMAMENT MICRO CARRY COMPENSATOR

Powerful Felt Recoil & Muzzle Rise
Mitigation in an Ultra-Compact Package

The Micro Carry Comp (MC<sup>2</sup>) was developed to provide concealed carry gun users with excellent recoil mitigation and muzzle control for faster follow-up shots without

adding unnecessary weight and bulk to the gun. Adding only a few tenths of an inch in length beyond a typical thread protector, the MC² provides brute strength and gas direction with its close-dimensioned 17-4 stainless steel ported baffle face. Its minimal size and weight ensure the MC² will not print through clothing or burden the user with unnecessary weight. Wrench flats provide easy gripping surface to torque the device into place. Fits most holsters without modification. Fits any 9mm barrel with ½-28 tpi threads. Black Nitride finish resists surface wear, corrosion, and heat scorching.

# 0

### PRIMARY MACHINE STEALTH COMP for GLOCK®

Effective Control of Muzzle Rise, Plus a Clean, Futuristic Look

The "Stealth" comp hides in plain sight: with its blocky, squared-off profile, it easily blends in with your Glock's squared-off slide. In fact, the Stealth mirrors the Glock factory

slide contour so well, that when it's installed on a G19 or G23 (with a 9mm conversion barrel), the pistol easily fits in a holster designed for the G34/35. Two narrow ports running horizontally across the top, plus two smaller side ports, supplemented by two small side ports, vent combustion gases upward to counteract muzzle rise and reduce felt recoil. The Stealth is machined from high-grade 7075 T6 aluminum billet and given a durable, matte black hardcoat anodized finish. And it's designed to fit 9mm barrels with  $\frac{1}{2}$ " -28 tp i threads (NOT for 40 S6W). The Stealth's attachment setscrews are hidden, so when it's installed, it offers an exceptionally clean, uncluttered appearance. Instructions and all necessary parts for the installation are included.

#100-024-393 Stealth Comp for Glock, 7F00QXF..... \$ 87.99

# LONE WOLF FLASH SUPPRESSOR & COMPENSATOR

Dynamic Recoil & Flash Control Options

Easy-to-install, specialized muzzle accessories give Glock shooters a choice of flash suppression or recoil control. Compensator's side ports direct gasses 30 degrees rearward and out of the top ports, resulting in reduced felt recoil and muzzle

jump. As a result, the shooter can remain centered on the target, allowing for quicker, more reliable follow-up shots. Integrated Allen screw indexes compensator for correct positioning. Flash Suppressor has longitudinal 6-port design that reduces muzzle flash, affording the shooter concealment and vision preservation in night-adapted environments.

SPECS: CNC-machined steel. Flash Suppressor - Black oxide finish. 1.6' (4cm) OAL. .750" (1.9cm) O.D. 1.1 oz (31.2g) wt. Fits pistols chambered in 9mm. ½" x 28 threads. Compensator - Parkerized, matte gray. 1.2' (34cm) OAL. 1" (2.5cm) wide, ¾" (1.9cm) high. 1.6 oz (45.4g). Available in 9mm with ½" x 28 threads and .40 S6W with ½" x 24 threads. Allen wrench and instructions included.

# STRIKE INDUSTRIES MASS DRIVER COMPENSATOR for GLOCK®

A Revolutionary Way To Tame Felt Recoil & Muzzle Flip

The MDC represents a quantum leap in compensator design. Current designs have largely been unchanged since the 1930s, so

the Strike crew decided it was about time for something revolutionary. Inspired by the idea of theoretical mass driver engines in space travel, the MDC is driven by the hot gasses expelled through the barrel after the round is discharged, acting as a counter balance system to attenuate mechanical recoil. By shifting the mass, an equal and opposite reaction is generated, much like mass driver propulsion would propel a space vehicle forward. Barrel-mounted compensators add reciprocating mass and increase the moment of inertia to the operating system, which can have a negative effect on reliable cycling of recoil operated handguns. By separating the compensator from the operating components after ignition, the MDC allows for close to stock cyclic speeds, due to less reciprocating mass. The compensator section of the MDC system has a widened bore to reduce baffle strikes and keyholing rounds, along with a 2.5mm relief cut at the top of the rear to reduce "lipping" and damage to the face of the pistol slide. It is compatible with most aftermarket barrels for Gen3, Gen4, and Gen5 Glock® 9mm pistols.

# SAMSON MANUFACTURING SMITH & WESSON M&P SHIELD/SHIELD M2.0

**POCKET COMP** 

Tames the Shield's Recoil for More Pleasant Shooting & Faster Follow-Up Shots

Samson's extremely compact compensator installs in a few minutes and really improves your ability to control your M&P Shield. This diminutive compensator redirects combustive gas away from the muzzle to tame felt recoil and eliminate muzzle flip - a welcome enhancement to a small, compact gun. Less recoil/muzzle whip means you can line up the next shot faster. Made to easily screw onto 1/2"-28 tpi threaded muzzles with a proprietary nut; includes insertion points for the hex head screws that actually secure the comp in place. Don't worry: this system is designed so it will not mar the threads! Easily removes for un-comped shooting, and when the Pocket Comp is off the gun, its barrel nut can serve as a thread protector. Machined from lightweight but unbreakable 6061 T6 aluminum, with a hardcoat anodized matte black finish. The Pocket Comp fits all 9mm M&P Shield & M&P Shield M2.0 pistols, and plays nicely with factory guide rod and recoil spring. It works reliably with a wide range of bullet weights and velocities, though 124 grain or heavier bullets seem to work best. If you're shooting 115 grain ammo, you'll want a load with velocity on the higher side. It adds an extra 1.15" to the barrel length, but it is purposely contoured to blend into the slide, so it'll appear like a natural extension of the pistol. Your Shield becomes a little longer but it's a whole lot easier to shoot. And if you're using a holster with an open bottom, you may not even need to shell out for new gun leather.

### TANDEMKROSS RUGER® MARK III™ & 22/45™ LCI INSERT

Upgraded Steel Part Replaces Plastic Factory Loaded Chamber Indicator

Steel part drops into Ruger Mark III and 22/45 pistols to replace the plastic factory original loaded chamber indicator. Fills in factory gap, helps make it easy to clean the chamber, and eliminates tab inside the receiver that can cause jams. Also enhances appearance of the pistol.

SPECS: Machined stainless steel, matte black finish. Comes with installation hardware. NOTE: This part disables the Loaded Chamber Indicator feature. Before ordering, please check to see if your state requires this feature by law.

#### TANDEMKROSS SMITH & WESSON SW22° VICTORY<sup>TM</sup> REPLACEMENT MAGAZINE DISCONNECT

Fire the Pistol Without a Magazine Inserted, Maintains Strong Mag Ejection

It may not look like much on its own, but Tandemkross's part is a simple, drop-in replacement for the factory magazine disconnect bar that defeats the magazine safety, allowing you to fire your SW22® Victory™ without a magazine inserted. The pistol will actually fire without the disconnect, but with

Tandemkross's part installed, you will also preserve strong magazine ejection, a capability valued by competition shooters who need to make fast mag changes. Drop-in, one-for-one replacement for the factory part. Machined from strong, durable stainless steel for long service life. A simple upgrade that improves your pistol's versatility without sacrificing reliability or convenience.

#### CYLINDER & SLIDE BERETTA 92/96 STAINLESS STEEL GUIDE ROD

Drop-In Replacement For Factory Plastic Part

No gunsmithing required to gain improved function and reliability with your Beretta Model 92 or 96. One-piece, stainless steel guide rod replaces the two-piece plastic Beretta factory guide rod; works with your factory recoil spring.

SPECS: Stainless steel, matte finish, silver. 3.5" long (9.1 cm) long, .28"(7.2mm) diameter. Fits Beretta models 92 and 96 only

#206-000-021 S/S Beretta Guide Rod, 6K24H64..... \$ 28.99

stainless steel and heat-treated for superb wear-resistance and a

lifetime of use. For a clean look, the assembly comes with two solid

stainless steel caps, one with a matte bead-blasted finish and the

other with a tough Black Nitride finish, so you'll be able to choose the

one that matches the aesthetics of your pistol. The double hole de-

sign allows quick and easy spring changes, or you can have multiple

assemblies with alternative spring weights ready to drop into the

gun for use with suppressors or different loads. Use the different-

colored caps as spring weight indicators. Fits original M&P pistols

("1.0" models) and the later M&P M2.0 series, both with 4.25" or 5"

barrels. Comes with 1/16" hex wrench for changing the caps. Only ad-

ditional item you'll need to supply is the recoil spring - but Brownells

#### **AGENCY ARMS** SYNDICATE MAGWELL FOR **POLYMER80 PISTOLS**

A Quick Upgrade for Your Compact 9mm/.40 P80 Pistol

This snap-on magwell serves as a handy scoop, funnel, or guide (choose your favorite term) to aid you in seating a fresh magazine FAST. Its low-profile "minimalist" design is ideal for a daily carry/EDC/CCW pistol built on a Polymer80 PF940C™ compact frame. The Syndicate 'well is molded from reinforced hard polymer - just like the P80 frame itself. It simply slips over the front lip of the grip frame and then snaps into the lanyard hole at the bottom rear of the grip frame. Yup, that easy! Fits Polymer80 compact frames for 9mm and .40 S&W pistols. Extends about .085" from the front of the grip frame and has an overall height of .485". Compatible with most aftermarket magazine base pads, though reduced-capacity magazines may require some modification to fit. Black.

**MAGPUL** 

Magwell has been designed help you get a fresh mag inserted fast,

when you're operating in a stressful environment - competition or a

self-defense situation. This lets you drop the empty mag and replace

it with a fresh one pronto - an important edge when seconds count.

It's optimized for use with standard capacity Glock factory magazines.

Magpul GL magazines, and a variety of aftermarket floorplates and

extensions that are available for both. Recent generations of reduced

capacity (10 rd) factory Glock magazines have several dimensional

differences which may interfere with any magazine well, including the

Magpul GL Enhanced Magazine Well. Some large aftermarket floor-

plates may also interfere. Fits Gen3 versions of G17, G17L, G22, G24.

G31, G34, G35 and G37. Compatible with factory and most aftermarket magazine floorplates, including Magpul GL mags. 💻

#### SAMSON MANUFACTURING SMITH & WESSON M&P SHIELD COMPACT MAGWELL

Improves Handling, Control & Reloading Speed of Your Compact Shield

Samson's one-piece Compact Magwell helps you maintain a full grasp on your Smith & Wesson 9mm M&P® Shield, giving you better control and the ability to make faster follow-up shots. The Shield is an excellent compact pistol, but the compactness that makes it popular for CCW means that, in its stock form, you also can't quite get a secure grasp on the grip with your entire hand. The Compact Magwell handily solves that problem. This all-aluminum magwell extension is super easy to install, no gunsmithing or permanent mods to the gun required. It won't pinch the mags, so they still drop freely without having to readjust your grip. The beveled base ensures reloads are quicker and fumble-free. Super-fast mag changes are good for competition and self-defense emergencies. Fits both original 9mmchambered M&P Shield and M&P Shield M2.0. Works with factory 8-round mags, including those fitted with Samson's +1 extension (sold separately). With its comfortable, extended finger ledge, this simple add-on makes shooting and reloading your Shield so much easier and more comfortable. What more could you ask for?

#### STRIKE INDUSTRIES EXTENDED MAGWELL FOR STRIKE80 PISTOL FRAME Put This Excellent "Mag Funnel"

This extended magazine well is designed specifically and ONLY for the Strike80 Compact 80% pistol frame. It's basically your big mag scoop for easier, faster, magazine insertion. It preserves the slender contours of the pistol grip, while helping to prevent the dreaded reload fumble that loses you seconds and drops you down in the competition results. Still lets you comfortably carry your pistol in an OWB or IWB holster. Made of lightweight molded polymer, black. Compatible with most aftermarket magazine base plates and extensions including the Strike Industries EMP. Look out: not compatible with factory Glock® Gen5 magazine due to their larger baseplate. Requires modification (at your own risk!) to accommodate baseplate of factory 10-round mags for Glock® 19.

#### APEX TACTICAL CZ P10C TACTICAL & COMPETITION **MAGAZINE RELEASES**

8B92C65......**109.00** 

Simple Redesign for Fast, Smooth, Easy Mag Release; All-Steel Construction

Apex's upgraded mag releases for the CZ P10c make it easier for you to drop the

mag, even if it's fully loaded. The cam angle has been redesigned so it concentrates and maximizes the pressure you apply to the button to kick that mag out pronto. Machined from STEEL barstock, heat-treated for added hardness and wear-resistance, and given a tough Black Melonite finish. Crisp 30 lpi checking on the button face ensures that once your finger find the button, it's not going to slip off. They are direct, drop-in replacements for the factory release button, so "no gunsmithing required." Swap the factory button back in any time. Tactical model stands +.080" higher from the grip frame than the factory button. Competition button stands +.120" higher, so no fumbled mag drops when the stopwatch is ticking!

**GL ENHANCED MAGAZINE WELL** 

#### BROWNELLS STANDARD & EXTENDED MAGAZINE RELEASES for GLOCK®

Sometimes Standard Is Fine; Sometimes You Need Something a Little Longer

Our standard magazine release/catch is a direct, drop-in replacement for the factory part. The contact surface of the

button will sit exactly where it does on the factory release. Extended models have the contact surface sitting a little more proud of the receiver, so they're easier to locate and you have a little extra leverage to engage them. Also a drop-in part, Gen3 models actually fit Gen1 thru Gen3 Glock® 17, 19, 22, 23,24, 25, 26, 27, 28 and 31. G43 fits.... well, obviously the Glock® 43. Good news: it is reversible, so it can be installed on either the left- or right-hand side of the receiver to accommodate shooters of either "handedness." G43X/48 - Shoot a G43X or G48? We also offer the Glock® factory replacement mag catch for those two models, listed below.

#### **GHOST EXTENDED MAGAZINE** RELEASE for GLOCK® GEN4

**Depress Mag Release Without Changing Your Grip** 

Polymer extended magazine release drops into Gen4 Glock to give extra length for fast magazine changes. Lets you reach the magazine release without shifting your grip. Textured surface gives no-slip function. Installs quickly and requires no modification to your pistol. SPECS: Polymer, matte black. 1.3" (3.3cm) long, .47" (1.1cm) wide. Fits models 17, 19, 22, 23, 26, 27, 31, 32, 33, 34, 35, 37, 38 & 39, Gen4 only.

#100-013-386 Gen4 Glock Ext. Mag. Release. 

#### LONE WOLF EXTENDED MAGAZINE RELEASE for GLOCK®

Aids In Fast, Positive Mag Changes

Drop-in replacement for factory magazine release has a deeply serrated button that protrudes farther from the frame to ensure positive, fast mag release on the first try. Gives a small but critical performance edge to the practical pistol competition shooter. Fits all 9mm, .40 S&W, .357 SIG, and .45 GAP Glocks. Same length as the factory catch on the G20, 21, 29, and 30, so it can be used as a direct replacement for the original part.

SPECS: Reinforced, molded polymer, matte black. Fits Glocks chambered in 9mm, 40 S&W, 357 SIG, and 45 GAP as an extended catch; factory-length replacement for G20, 21, 29 and 30. Does not fit G36, 42, 43, or any Gen4 model.

# ZEV TECHNOLOGIES ALUMINUM MAGAZINE RELEASE for GEN4/5 GLOCK®

A No-Fail, Last-a-Lifetime Metal Part
- Install It & Stop Worrying About
Mag Release Failure

Zev's upgraded magazine release has honeycomb-pattern texturing on

the contact surface to ensure secure, nonslip engagement of your thumb when you're activating the release to dump a mag. The surface is angled to the rear to line it up nicely with the pad of your thumb as it makes contact with the button. This adds up to faster and easier mag changes when seconds count - either in competition OR in more extreme circumstances. It is machined from billet 6061 aluminum and given a tough, matte black, mil-spec hardcoat anodized finish. Installs in a few minutes with the use of needle-nose pliers and a slim, long-shaft, slot-head screwdriver. Probably also best to replace the mag catch spring during installation. Fits Gen4 and Gen5 variants of these standard-frame Glocks: 17, 19, 19X, 22, 23, 26, 31 thru 35, 37 and 45.

# GHOST BULLET SLIDE RELEASE for GLOCK® Forward Model

Ghost's Bullet Slide Release (BSR) has an enhanced control that helps you engage in fast, positive slide release under stress. The biggest benefit of the BSR is its oversized finger pad because a

larger surface is easy to locate and gives you more leverage, making release of the slide possible even when your finger doesn't come down square on the button. The control pad is contoured and streamlined so it does not present an extra risk for snagging on clothing or other gear during a draw from holster. It's left-handed friendly - very to operate with the index finger when firing lefthanded. AND it's ruggedly built from stainless steel to stand up to hard use. Matte black finish blends perfectly with slide and frame. All versions of the Bullet Slide Release are easy to install and drop right into your pistol, replacing the factory release with no other permanent modifications to the gun. Forward model is for shooters using the modern "thumbs forward" shooting technique. As the name indicates, the control pad is moved forward, getting it out of the way so your thumbs do not accidentally push the release UP while shooting and lock the slide open on you before the mag is empty. If your thumb stance is a little different, it will also help keep you from accidentally pulling the release DOWN and preventing the slide from locking open on the last round.

SPECS: Standard & Forward BSR fit these Glock® Gen1 thru Gen4 models: 17 (three-pin only), 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 37, 38, 39, 40 & 41. DOES NOT work on Gen5 models. Separate G42/43 BSR model for Glock® 42/43. This model available in standard black or matte silver finish.

# EXTENDED SLIDE RELEASE LEVER for GLOCK®

Easy To Hit For Positive Slide Release On The First Try

Drop-in replacement for factory slide release lever has a much larger finger pad and a

trapezoid-shaped bump that help ensure you release the slide fast, on the first try, after a reload. Saves precious seconds that can be lost making multiple swipes to release the slide and chamber the next round. Low profile and smooth contours will not affect holster fit or snag on clothing. Rugged, all-steel construction; matte black finish matches Glock factory finish. Separate models to fit current-production 3-Pin and early 2-Pin pistols, plus G37/38/39 pistols chambered in .45 GAP. **Release + PMAG Paks** contain the extended slide release plus a Magpul PMAG 17 GL9 17-round magazine.

SPECS: Steel, matte black finish. 3-Pin fits all guns with separate trigger, locking block, and trigger housing pins, including early 2-Pin G19. Does not fit early G17, 17L, and 34 2-Pin guns. 2-Pin fits G17, 17L, and 34 that do not have a locking block pin, manufactured from 1986 to mid-2002. 37/38/39 fits all G37, 38, and 39 pistols.

# KÄGWERKS EXTENDED & RAISED SLIDE RELEASE for GLOCK®

Enables a Higher Hold on the Gun for Better Control Without Accidentally Activating the Slide Release

The Kägwerks extended slide release is specifically designed to give the shooter a more secure grip while preventing slide stop override. The best way to get maximum statements of the secure of the

mum control of a pistol is to get your hands up as close to the bore axis as possible. The problem is this can lead to either accidentally depressing the slide release and preventing the slide stop from activating after the last round leaves the magazine OR pressing the lever up and engaging the slide stop after every round. A problem either way! So the Kägwerks release enables a higher support hand position on the pistol, which improves control and increases accuracy and speed, while decreasing the risks of slide release malfunctions. The extended lever makes it easier for folks with short thumbs to reach the slide release and operate it with maximum leverage, so less pressure is required to get the slide to release - important for getting back in operation after a reload. Made of steel with a tough, corrosion-resistant black finish. Gen3/Gen4 fits Glock® 17, 19, 22, 23, 26, 27, 31, 32, 33, 34 and 35. Ambidextrous Gen5 is fits Glock® 17,

# LONE WOLF DIST. EXTENDED SLIDE LOCK LEVER for GLOCK®

Easier Slide Removal For Quicker Field Stripping

If you've ever tried to field strip your Glock with even slightly oily or sweaty fingers, you'll appreciate the benefit of this extended slide lock lever. Drop-in replacement is 3mm longer than the factory original part to provide a firmer grasp, so you can remove the slide quickly without fumbling with the lever. No gunsmithing required; easy to install, no permanent alterations to the gun. Gun will still fit all standard holsters. \$\bigsec{\text{ECS}}\$: Steel, black oxide finish. 19's' (29.9mm) long. Fits all Glock pistols except M36.

100-002-412	Extended Slide Lock Lever for Glock,	
	2K10M39	

# LONE WOLF 3-PIN EXTENDED SLIDE STOP

Aids In Smooth Reloads & Fast Return-To-Battery

Drop-in replacement for factory part has a larger, easier-to-locate thumb pad that helps you release the slide and return to battery faster after an empty-gun mag change. Fits all "3-pin" (trigger pin, locking block pin, and trigger housing pin) Glocks, except G36. FFECS: Steel, electro-coated, matte black finish. Fits all 3-pin Glock pistols, except G36; will not fit early 2-pin 17, 17L and 34.

#### SMART LOCK TECHNOLOGY SPRINGFIELD XD MAGLOC® EXTENDED SLIDE RELEASE

Large, Easy-To-Locate Contact Pad For Fast, Positive Slide Release

Replacement slide release lever has more than twice the contact surface of the XD9/40's tiny factory part to make hitting the release or manually locking back the slide easy, painless, and fast. Helps you reload faster—simply hit the Magloc button with the thumb of the shooting hand to close the slide on a fresh mag, rather than manually racking with the off hand. The larger button surface spreads the pressure you apply over a larger area of the thumb, so it feels like you're using less pressure to operate it. Machined, hardened steel construction, with three large horizontal grooves to give secure, non-slip purchase; low profile won't interfere with any holster designed for the stock XD.

SPECS: Steel, blued, matte finish. Contact Pad - 11/8" (2.8cm) long x 5/16" (7.9mm) high. Fits Springfield XD standard and compact models in 9mm or .40 S&W only. Does not fit pistols with thumb safety or any of the XDM series.

#### VOLQUARTSEN RUGER® MARK II/IIITM EXTENDED BOLT RELEASE

Oversized Thumb Pad For Fast, Positive Operation

serrated face ensures fast, positive closing of the action, especially during high-stress competition. Gives the shooter a secure, nonslip grip with or without gloves on. Replaces the factory bolt release on both Mark II and Mark III pistols in minutes. No permanent modifications required.

SPECS: Stainless steel, natural silver finish. Pad is 9/16" (1.4mm) long x 7/16" (1.1mm) wide. .2 oz. (5.6g) weight.

#930-000-067 Extended Bolt Release, Silver, 3Z11N04. . \$ 12.99

#### **TANGODOWN** VICKERS TACTICAL SLIDE STOP for GLOCK®

**Optimum Shape** To Ensure Positive Thumb Contact

Redesigned thumb pad places the pad slightly forward of the factory position, so your thumb gets to it quicker and returns the pistol to battery faster. Pad is shaped to aid in positive contact to help prevent accidental slide stop engagement, even when you're wearing gloves. Stamped and formed from durable 4130 steel, then treated with a special hardcoat finish that resists rust and wear. SPECS: 4130 chrome-moly steel, black, matte finish/ includes spring. Gunsmith installation recommended. VTSS-001 fits Glock 17, 17L, 18, 19, 21, 22, 23, 24, 25, 26, 27, 28, 31 thru 35, and 41. VTSS-002 fits Glock 42 and 43 only. VTSS-003 fits Glock Gen5 models 17, 19, 19X, 26 and 34. VTSS-004 fits Glock 43X and 48.

For Perfect Fit & Performance

you have a replacement mag made to fit your gun. None of the compromises you make with cheap aftermarket mags. Heat-treated steel tube, "memory resistant" music wire spring that resists taking a set, self-lubricating poly-

#### **BERETTA MODEL 92 FACTORY HIGH CAPACITY MAGAZINES**

Dependable, Factory Magazines For Superior Performance

Factory, double stack 9mm magazines are ultrareliable in combat or competition. High-tech manufacturing techniques allow seamless construction

for snag-free follower movement and smooth insertion into the mag well. Self-lubricating follower is injection molded from highstrength polymer for durability. Numbered witness holes on the backside allow easy viewing of remaining ammunition. Built from high carbon, heat-treated steel for maximum strength; includes a high tensile strength music wire spring that resists memory and won't weaken over time. Removable base pad allows easy cleaning. Sand-Resistant 15-Rd model features a synthetic base pad, a full-length "sand slot" to allow debris to fall out, and a special dark gray, high-lubricity coating for improved reliability in desert environments. Adopted for use by the USMC. 17-Rd, 20-Rd, and 30-Rd magazines come with a synthetic base pad and an attractive, high-gloss blued finish. 20-/30-Rd feature a polymer shroud that protects the lower half of the magazine and acts like a grip extension for added control.

SPECS: Body - Carbon steel, heat treated. Spring - Music wire. Follower/ Pad - Polymer, black. Fits all 9mm Beretta 92s, except Type-M and old Model 92/92S that use a single stack magazine. 15-Rd SR - Dark gray, high-lubricity coating, polymer base pad. 17-Rd/30-Rd - Blued, gloss

#### KEL-TEC FACTORY PISTOL MAGAZINES

#### With Extended Base Pads For Extra-Secure Grasp On Pistol

The same magazines that came with these pistols when they were new. Fastest, easiest way to make sure you get spare mags that fit and run correctly in your gun. Extended base pads give an extra grasping area for better control of the pistol and more comfortable shooting.

#### MAGAZINES THAT WON'T HOLD ADVERTISED NUMBER OF ROUNDS

New magazines, and/or magazines with new springs, may not let you load them with the maximum number of rounds they should hold. Here's the solution: load them up with the maximum number of rounds you can and let them set for a few days. The new spring will take its normal "set" and allow the rest of the rounds to be loaded.

#### FACTORY PISTOL MAGAZINES for GLOCK®

Choose Genuine Factory Magazines For Top Performance & Reliability

Be confident your Glock pistol will perform to factory standards each and every time with genuine Glock factory magazines. Manufactured to Glock

specifications in Austria by Glock. Available in all factory round counts, including high-capacity models. All models include round count indicator on rear face of magazine body and standard factory baseplate. Listed below by Glock model designation and caliber. Available in colors to match Glock factory slide and frame colors: Black (BLK), Flat Dark Earth (FDE), Coyote (COYO), and O.D. Green (ODG). Gen5 magazines are contoured at the base to match the flared magwell of Gen5 pistols, but are ALSO compatible with earlier Glock pistols - a quick performance upgrade for your Gen1 to Gen4 guns! SPECS: Polyethylene body over steel liner.

#### **KCI USA** MAGAZINES for GLOCK®

Wallet-Friendly Full- & Extra-Capacity Replacement Mags Built to Correct Factory Dimensions

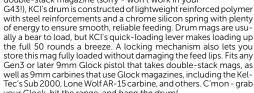

> KCI's mags for Glock® pistols are built to shrug off hard use and maintain reliable feeding, round after round. These mags have the same sturdy polymer-and-steel construction as factory magazines, with a tempered chrome silicon spring and a smooth polymer follower that keeps the round stack moving. The baseplate removes easily for cleaning, but will not work loose under recoil. And you even get witness holes - a feature you expect on factory or high-end aftermarket

magazines - so you can check ammo status at a glance. KCI's factory-capacity magazines are with any magazine accessories that fit the original Glock® factory mag, so they're perfect for rough use, tactical drills, and any other training or real-world application that puts aggressive wear on magazines and equipment. Extended Capacity models enable you to send plenty of practice rounds downrange without having to reload. They're also the ideal tubes for 9mm AR-15 carbines/pistols/SBRs that use Glock® mags. Built to good-as-factory specs, KCI magazines will keep the rounds cycling smoothly and reliably through your Glock pistol or "AR-9" carbine, pistol, or SBR. And the price? THAT will make you smile almost as much as the fun of shooting sessions with fewer reloads.

Brownells Gun Tech™ Note: Like many extended-capacity magazines, a KCI extra-cap stick mag needs to be loaded/unloaded several times before it will accept its full stated capacity. Try loading it to half capacity and leaving overnight to help set up the spring and make it easier to insert a full load later.

50-RD DRUM MAGAZINES - The ultimate highcapacity magazine for your 9mm Glock is KCl's 50-round drum mag. It certainly cuts down the number of times you have to stop for a mag change during range practice. It's also an excellent way to increase the capacity of a 9mm Luger chambered AR-15 that uses Glock® pistol magazines. It's compatible with any 9mm Glock® pistol that uses a double-stack magazine (sorry - won't work in your

your Glock, hit	the range, and bang the drum!	-

#### HECKLER & KOCH H&K P30/VP9 FACTORY MAGAZINES &

#### **CAPACITY CONVERSION KIT**

#### FULL Capacity With Witness Holes & Choice of Black or Red Follower

These are your classic magazines with a sturdy steel-body (blued finish) with witness holes indicating 4 to 17 rounds in the tube. There's a polymer base pad to protect the mag from damage when dropped on hard surfaces and a polymer follower. Said follower is available in traditional Basic Black

or Red, if you're feeling kinda wiggy and/or just need a simple, fast visual indicator of when the magazine is empty! 15-Rd to 17-Rd **Conversion Kit -** Got a bunch of old 15-rd mags for your VP9 or P30 and want to get the extra capacity of these new mags without buying all new magazines? The H&K factory conversion kit is your solution. Includes replacement follower, spring, floorplate, and locking plate. Just disassemble your old mags if you're cleaning them, reassemble with the new parts, and enjoy the extra 2 rounds of capacity!

MAGPUL PMAG GL9 MAGAZINES

for GLOCK®

Brings Magpul Reliability & Durabillity

To Your 9mm Glock® Handgun

rable magazines fit 9mm Glock handguns, including

Gen4 models. Reinforced feed lips, a stainless steel

spring and a high visibility anti-tilt follower ensure

reliable feeding. Pushbutton release on the floor-

plate allows the magazine to be easily disassembled

without tools. Floorplate also has a pen dot matrix on

the bottom for marking and identifying magazines. The GL9 consis-

tently drops clear and free when released; loaded or empty. 17 GL9

fits flush at the base of the Glock 17 grip, with minor protrusion on

compact and subcompact models. 15 GL9 fits flush on Glock 19, with some protrusion on subcompact pistols. 21 & 27 GL9 fit all full-

size, compact, and sub-compact double-stack Glock 9mm variants

with some protrusion below the grip. 21 GL9 meets the 140mm overall length restriction for competition magazines. 26 GL9 fits

flush on Glock 26; adds a finger ledge to give you a better grasp on

the gun, plus holds two more rounds than factory mag, for 12-round

capacity. 27 GL9 meets the overall length requirements for 170mm

competition magazine. PMAG 10 GL9 models hold 10 rounds and

#100-016-642 PMAG 17 GL9 Magazine, 9Z11E97 . . . . \$ 13.99

are available for the G17 and the G19.

Constructed of a proprietary polymer, these du-

Reliable-Feeding Competition Mags For Your Ruger .22 Pistol

Durable, blued steel 10-round magazine offers positive feed and ejection for the competition shooter. Magazine comes with attached machined aluminum extended base pad that helps magazine in-

Mark II/III

sertion and removal and allows the shooter to determine magazine orientation by touch. Designed to not get stuck inside the pistol if magazine is accidentally inserted backwards. Fits both Mark II and III pistols. Does not fit Ruger Mark I pistols.

SPECS: Magazine - Steel, blued finish. Polymer follower. Base Pad: Machined aluminum, natural finish. 10-round capacity.

#### **MECCANICA DEL SARCA (MDS)** BERETTA, CZ & SIG **PISTOL MAGAZINES**

Imported Direct from Italy -Factory Mag QUALITY at a BUDGET Price!

Brownells straight to the source for quality pistol magazines, Meccanica del Sarca of Italy. Meccanica del

Sarca has been producing OEM magazines for major firearms manufacturers since the late 1980s. Now, these quality magazines are available direct to you.

MDS stamps, welds, and finishes the magazine bodies in-house, maintaining the strictest quality controls for heat treatment and surface finishing suppliers. These magazines feature a dark blued finish that resists corrosion and adds a slickness to help make mag changes smooth and fast. The polymer follower glides smoothly inside the blued magazine body. Witness holes at the rear provide a guick assessment of remaining cartridges. So enjoy factory mag quality at a budget price!

#### MEC-GAR BERETTA M9/M92 **OPTIMUM MAGAZINES**

#### **High Capacity With Anti-Friction** Coating; The Mags That Really Work

You'll gain reliable, additional round capacity with these high quality replacement magazines that really fit and function like proven factory magazines. Tempered steel body with hardened feed lips is treated with a phosphated anti-friction coating inside and out to ensure drop-

free operation and no-jam feeding. Hardened, high tensile music wire spring and supported, self-lubricated nylon follower eliminates follower tilt so every round feeds flawlessly. Flush-fitting, 18-Round magazine features a tough synthetic base pad that removes easily for magazine cleaning. **20-Round** model includes a removable, synthetic "Plus 2" base pad. Witness holes in the rear side on both models provide fast, remaining round count.

SPECS: Body - Hardened carbon steel, black phosphated anti-friction coating. Spring - High tensile music wire. Follower - Nylon, black. Fits Beretta M9 and M92, 9mm caliber.

#### **PRO MAG 50-RD DRUM MAGAZINE** for GLOCK®

#### A Bit of Extra Capacity To Cut Down on the Frequency of Mag Changes

When you have a good string going at the range, who wants to stop to reload? OK, yes, you can use this ultra-super-incredibly high capacity magazine in your double-stack Glock® pistol, but we're thinking it's meant primarily for the increasingly popular "AR-9" carbines that use Glock® mags. Either way, Pro Mag kepts the weight down as much as possible with a proprietary DuPont® Zytel™ based polymer mag body and an injection molded follower.

The considerable spring power needed to motivate the huge round stack inside comes from a tempered chrome silicon steel mag spring. There's a reinforcing steel liner in the section on top that fits inside the mag well. G17/G19 model fits G17, G19, and all Gens of Glock® pistols that accept a double-stack 9mm mag (NOT the G43). Separate model for **G43X/G48**.

#### PRO-MAG FN FIVE-SEVEN **30-ROUND MAGAZINE**

Increases Capacity By 10 Rounds Over Factory Magazine

Rugged, lightweight polymer magazine increases the capacity of your 5.7 x 28mm FN Five-seveN pistol by an additional 10 rounds over the factory mag. Extension is contoured for a smooth, seamless fit to the bottom of the mag well, with exterior texturing that matches the pistol grip's texturing.

SPECS: Reinforced, injection-molded polymer, black. 30-round capacity. Fits FN Five-seveN pistol chambered in 5.7 x 28mm.

#### SHIELD ARMS S15 MAGAZINE for GLOCK® 43X & 48

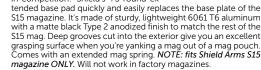

#### 50% MORE Capacity Than Factory Magazine, SAME Size!

The Shield Arms S15 Magazine boosts the capacity of your Glock® 43X or 48 an additional FIVE rounds, from 10 to 15, without extending any farther out the magwell than the factory magazine. The result is a super-compact, easy-to-carry 9mm pistol with the same mag capacity as the much larger Glock® 19! The S15 gives you this firepower boost without sacrificing the reliability of your pistol. The Shield crew

designed an all-steel mag body that frees up more interior space than found in the factory's thicker polymer-and-steel walled mags. The redesigned interior geometry introduces some "stagger" in the round stack - enough to squeeze in an extra 5 rounds. At the same time, when the S15 magazine is seated, the base plate still fits flush across the bottom of the grip. The S15's no-flex body of hardened steel has a durable, satin-black, self-lubricating, synthetic finish. Fits Glock® G43X and G48 ONLY. The bottom line: The Shield Arms has produced a rugged, reliable magazine with 50% more capacity with NO need for any extended base pad that sticks out below the grip and makes your EDC pistol less easy to conceal! Bundles - Mags are available singly or in handy 3-paks (c'mon, who can settle for just one 15-round mag?) and in a 3-pak bundled with Shield's Enhanced Magazine Release for the G43X/G48, made of steel and recommended by Shield for use with these magazines.

#### **SIG SAUER FACTORY MAGAZINES**

#### **Factory Mags for Perfect** Fit & Reliable Function

Original factory magazines fit perfectly in your SIG Sauer pistol. These are the same magazines shipped from the factory with your gun and are listed in the factory parts section of our Big Catalog. Stainless steel tube

is polished to a slick finish that resists attracting dust and dirt, and easily slides in and out of the magwell. Dimpled steel follower helps hold the last round in place; aids in controlled feeding. Full-power factory spring feeds round after round reliably. Witness holes on each side instantly let you know how many rounds are in the magazine. Extended-capacity mags have a contoured extension that matches the pistol grip and gives added grip surface for improved control and handling.

#### Made The "Factory Way" For Smooth, Reliable Feeding

Long-lasting, stainless steel, high-capacity magazines are made to precise, factory tolerances to ensure maximum firepower and reliability from your Springfield XD pistol. Steel spring and molded polymer follower feed rounds smoothly and reliably to the chamber, every time. Highly polished body won't drag or hang-up during highspeed, tactical reloads. High-impact, polymer, base pad

removes easily for cleaning. Numbered witness holes provide quick round count. Magazines fit 4" Service and 5" Tactical model pistols. SPECS: Body - Highly polished stainless steel. Base Pad & Follower - Polymer, black. Capacity: 9mm - 10-, 13- and 16-rounds; .40 S&W - 11- and 12-rounds; .45 ACP - 9-, 10- and 13-round capacities available. Fits Springfield XD Service and Tactical model pistols with 4" or 5" barrel. .45 ACP 13-round magazine also fits XDM.

#### STRIKE INDUSTRIES TRANSLUCENT MAGAZINE for GLOCK® 17

#### For the Ultimate in Ammo Status Visibility

Magazine release cuts are designed on both sides of the mag so it will work with right, left, and ambidextrous magazine release setups found on factory Gen3 thru Gen5 frames. A built-in hook slot retains the steel locking plate of the SI Extended Magazine Plate (EMP), sold separately, for extra security. Side cuts on the baseplate provide extra grasping "purchase," while tool-less disassembly ensures quick and easy removal with a simply push using your fin-

ger nail. Paintable triangle markers at the top of mag body can be used to help you identify when magazine is correctly oriented for a reload. ID markers on the bottom of the baseplate allow you to custom mark your mags to make sure nobody goes home with your stuff. Fits Gen3 thru Gen5 variants of the Glock 17, 17L, 19, 26 and 34.

#100-047-158 Transluscent 17-Rd Mag for Glock 17, 

#### **SPRINGFIELD ARMORY** XD-S™ MAGAZINES

#### **Factory Magazines** For 9mm & .45 Compacts

Same as the mags that came with your pistol, these single-stack stainless steel magazines resist wear and corrosion for extra-long service life. Molded polymer follower with

integrated steel plate reliably raises the slide lock into position after the last round is fired. Base plate removes for cleaning. 7-round .45 mag and 9-round 9mm model come with polymer sleeves that match both backstraps that came with your pistol.

SPECS: Stainless steel mag body, polished natural finish. Fits single-stack, .45 ACP Springfield XD-S pistols.

#### **KRUNCH PRODUCTS MAG SLICK**

#### Keeps Magazines Clean & Working

Aerosol, dry lubricant, improves magazine function and feeding. Protects against corrosion, repels dirt. Dries in seconds, safe for all metal and plastic mags. SPECS: Aerosol, 6 oz. (170 g) wt.

#### SAMSON MFG. S&W M&P SHIELD +1 MAGAZINE EXTENSION

Adds +1 Round To Capacity & Provides a Finger Ledge for the Support Hand

Not only does Samson's magazine extension let you carry more ammo on board, it also helps you yank a stuck mag out of your Smith

& Wesson M&P Shield. It provides these benefits on both 7- and 8-round factory magazines, and it still allows the mag to drop freely from the magwell without catching on the shooter's hand. The extension's leading edge acts as roost for your little finger, enhancing the stability of your hold on the pistol. Exterior relief cuts aid in yanking the mag to clear Type III (double-feed) malfunctions and in one-handed malfunction clearing. Made of tough, unbreakable, machined 6061 T6 aluminum, with a choice of a black anodized finish. Fits 9mm M&P Shield & M&P Shield M2.0 pistols. Uses pistol's factory magazine spring.

#### STRIKE INDUSTRIES **ENHANCED MAGAZINE PLATES** for GLOCK®, H&K & SIG

Increases Mag Capacity, Improves Control & Expedites Mag Changes

Enhanced Magazine Plate (EMP) magazine extension adds extra rounds to your pistol's magazine capacity and gives you an extended

gripping surface. Increases your firepower, while it gives you better control - and so better potential accuracy - when firing the pistol. Extended surface aids in smooth, fast, positive mag changes, too. Made of strong, impact-resistance molded hard polymer, with an aggressively "knobby" texture further enhances your hold on the pistol. Retains factory magazine spring.

#### TARANTACTICAL FIREPOWER BASE PAD

Increases Mag Capacity & Helps Mag Drop Free

Machined aluminum magazine baseplate easily slips onto semi-auto pistol mags to increase capacity. With the Firepower installed, the mag's overall length stays within the USPSA 140mm limit. Increases capacity of a 17-rd 9mm mag to 23 rounds (+6), and a 15-rd .40 S&W mag to 20 rounds (+5). Still allows a fully loaded magazine to easily loads into the gun,

SPECS: Machined aluminum, hardcoat anodized, matte black. Glock -1½" (3.8cm) tall, 1¾" (4.3cm) long, 1" (2.5cm) wide, 1.7 (47g) oz. wt. **S&W** M&P = 11/4" (3cm) tall 11/4" (3cm) long 1" 2 5cm) wide 1 3 (37g) oz wt

#### **TAYLOR FREELANCE EXTENDED MAG PAD**

SAW MAD

Increases Capacity, Maintains USPSA Mag Length Limits

Extended base pads of machined aluminum or Delrin® clamp securely to the magazine with an aluminum retainer plate, eliminating unexpected "speed unloads" when a plastic snapon extender fails. Designed to keep magazine overall length within the 140mm and 170mm USPSA and IPSC limits. Some models come with an extended magazine spring; others use factory spring. Either way, there's nothing more for you to buy! Glock fits "drop-free" magazines (will not fit original, non-drop magazines).

SPECS: Machined aluminum, hardcoat anodized, or Delrin (Glock only), black. Aluminum clamp, natural silver.

#### TANGODOWN VICKERS TACTICAL **FLOORPLATES**

Oversized For Reliable Mag **Extraction Under All Conditions** 

The Vickers Tactical floorplate gives the shooter an enhanced gripping surface for ripping a stuck magazine from the gun if it refuses

to fall free during a crucial reload. The larger plate works well with gloves and can even be hooked on a belt or holster in a tight situation. Plates are made of glass-filled nylon for high strength and impact resistance and have eight concave dots molded into the bottom for numbering or marking your magazines. Standard Frame Glock fits magazines for pistols in 9mm, .40 S&W, .357 SIG, and .45 GAP. Also fits Gen5 G17 and G19. Sold in a 5-Pak. G42 fits Glock model 42 only. Sold in 2-Pak. M&P fits Smith & Wesson M&P full-size magazines for pistols chambered 9mm, .357 SIG, and .40 S&W; will not fit M&P Compact mags.

SPECS: Nylon, matte black (BLK), Flat Dark Earth (FDE), O.D. Green (ODG), Glock Factory Green (GFG), and other listed below. 1.560" (3.97cm) long, 1.435" (3.64cm) wide, .250" (6.4mm) thick.

#### **TANGODOWN VICKERS TACTICAL +2 BASE PAD** for GLOCK® 43

Boosts the Mag Cap of Your Glock Pocket Rocket By 2 Rounds

This Vickers mag extender serves two valuable functions on

your G43: (1) For shooters with medium- to large-size hands, it extends the pistol's grip just enough to provide room for your bottom two fingers. You can now have a complete, secure hold on the pistol with your whole hand - particularly helpful on such a small gun firing full 9x19mm ammo. (2) It adds two rounds to the magazine capacity, boosting it from 6 to a more reassuring 8 rounds. A little more firepower is always good, right? Made of reinforced injection molded polymer - the same material the magazine body itself is made of. Includes a longer heat-treated stainless steel spring to provide enough oomph to keep the ammo moving AND ensure lastround slide lock back. Simply pop off the factory mag's floorplate and replace with this one. Fits Glock® G43 only.

#### APEX TACTICAL SMITH & WESSON SD/SD-VE SERIES SPRING KIT

Lightens & Smooths Pull, **Delivers a Snappy Reset** 

Simple, easy-to-install set of three springs produces a smoother trigger pull and improved reset - and is safe for reliable duty/carry use. Install

as a stand-alone upgrade or in conjunction with Apex's SD Polymer Action Enhancement Trigger. Alone, this kit will reduce trigger pull weight by approximately 2 lbs, from the factory weight, while it smooths the pull and gives a guick, positive reset. Kit contains trigger return spring, striker spring, and striker block spring, plus an Apex SD slave pin to assist in installation of the trigger return spring. **Note:** NOT for use in the Sigma series pistols.

**#100-019-864** S&W SDVE Spring Kit, 7F18G99...... \$ 19.99

#### BROWNELLS/ISMI S&W M&P **HIGH-CAPACITY EXTRA-POWER** MAGAZINE SPRING

Applies More Pressure To Follower For **Smooth Feeding From Extended Magazines** 

Extra-length magazine spring replaces factory-supplied spring for use with aftermarket magazine extenders and extended base pads that increase round capacity. Gives follower up to 10% more power for smooth, reliable feeding of rounds. Made of certified aerospace-spec chrome silicon wire, then heattreated and stressrelieved to ISO 9000 standards.

SPECS: Chrome silicon steel wire. Fits S&W M&P pistols chambered in 9mm, .40 S&W, and .357 SIG.

#078-000-168 S&W M&P Mag Spring, 8G5M99......\$ 7.99

#### **BROWNELLS** CHROME SILICON MAGAZINE SPRINGS for GLOCK®

Consistent Delivery Of **Every Round** 

Chrome silicon springs deliver consistent pressure and reliable feeding of every round in high-capacity magazines. Many springs continue to set and weaken over time, eventually failing to feed all the rounds in the mag and require replacement. Quality springs, like our chrome silicon springs, take an initial set (all springs do) then stabilize for long service life. Models for Glock 17/17L (7 & 19 rds) and Glock 19 (15 & 17 rds).

SPECS: Chrome silicon. 7" (17.7cm) long. Models for Glock 17/17-L – 17 & 19 rds. Glock 19 - 15 & 17 rds. Available in 3-paks

#### **GHOST** COMPLETE SPRING SET for GLOCK®

Fire Control Springs For Sport Or Defense

reduced-power safety plunger spring and a 6 lb. trigger spring. #100-009-557 Glock Complete Spring Kit, 7K8E79..... \$ 10.99

A NOTE ON SPRING "SET" - "Set" is normal in all springs, and is the "held-compression" all springs take after being put under compression for a length of time. What is critical about "set" is that all springs do not take it equally, or stabilize at a predetermined amount of "set". In measured tests, Brownells Pro-Springs™ took 4 to 10 times less set after equal time under compression than did other springs tested. And once stabilized, took no more set. The other springs continued to take "set" until we stopped testing them. Prove it to yourself... measure the springs you want to test; lock them in a vise overnight, and when you take them out, measure how much length has been lost. (Do the test on the same springs a second - or third - time. Consider the effect this "shortening" will have an action job that was based on the spring's original length. Trigger pull, action smoothness and even the safe functioning of the gun can be ruined by an inferior spring.

#### **BROWNELLS** WOLFF PRO-SPRINGS™ FOR ACTION-TUNING

Brownells Pro-Spring™ Kits are made from the very finest high-tensile spring wire - wire that is formulated and drawn especially for the finest quality springs. The tension is actually built into the wire as it is being drawn - not added afterwards by heat treating. Consequent-

ly, Brownells Pro-Springs will continue to their ability to return to the required length and tension you need. It's simply not worth taking a chance when the best quality springs are only a small part of the repair or custom professional designs. - designed and made expressly for us by Wolff, the Dean of quality gun springs for the professional firearms industry.

SPECS: RP = Reduced Power, XP = Extra Power, FSW = Factory Standard Weight

#### **ED BROWN** SMITH & WESSON M&P/M&P M2.0 **FLAT WIRE RECOIL SPRING**

Ultra-Reliable for Your 9mm

This premium replacement flat wire recoil spring for the fits the Smith & Wesson M&P 9mm and M&P 2.0 9mm. The standard M&P is equipped with a 15 lb, recoil spring, and this is your best option to ensure maximum reliability in your self-defense gun. The 11 lb. spring is ideal for use with suppressors or subsonic ammunition. Use the 13 lb. spring for light target loads. The EB crew recommends replacing the recoil spring after putting 30,000 to 40,000 rounds thru the gun. Their flat wire spring is the longest-lasting handgun recoil spring made, with up to 10 (TEN!) times longer service life than a conventional coil spring.

#### **WOLFF EXTRA POWER STRIKER SPRING for GLOCK®**

Improves Ignition Reliability On Glock Pistols

#### WWWWWWWW

Drop-in 6 lb. extra-power striker spring replaces the Glock 5.5 lb. factory spring to improve ignition reliability. Ideal for use with heavy primers or to tune trigger pull, the spring is also recommended by Ghost when installing their Rocket 3.5 connector (not included) on 45 ACP or 10mm models. Not for use with reducedpower recoil springs. Sold in 3-paks.

SPECS: Chrome-silicon steel. 6 lb. rated. Fits all Glock pistols. Do not use with reduced-power recoil springs.

#### **WOLFF TRIGGER GROUP COMPETITION PAK for GLOCK®**

### Easily Improve & Lighten Trigger Bull Withbout

Trigger Pull Without Permanent Modifications

Contains the correctly calibrated springs you need to lower pull weight and improve trigger pull quality of your Glock pistol without complicated gunsmithing or permanent alterations. Installing this kit will not disable or diminish the effectiveness of the well-proven Glock Safety System. Designed specifically to meet the needs of competitive shooters; this alteration is not recommended for duty pistols.

SPECS: Steel. Includes one (1) each of the following springs: 4lb. reduced power striker spring, reduced power safety block spring, and extra power trigger spring. Fits all models and calibers of Glock pistols.

#### **ZEV TECHNOLOGIES COMPETITION SPRINGS for GLOCK®**

#### For A Smoother, Crisper, More Refined Trigger Pull; Drop-In Installation

Precisely calibrated spring weights deliver consistent force through the entire compression/release cycle to give you a light, refined trigger without sacrificing the reliability of your pistol's Safe Action system. High-stress, aerospace-grade stainless steel spring wire is heat- and cryo-treated for 99.99% consistent energy output, so trigger pull feels the same every time. For maximum improvement over factory pull, use with V2 Race Connector, below. Trigger Spring has nearly 30% more power than factory spring, yet actually reduces pull by as much as 1 lb. for improved control. Also produces faster trigger reset for quicker follow-up shots. Reduced power Safety Spring reduces friction caused by the firing pin safety, further smoothing the pull. Striker Spring is designed for improved consistency and durability over factory spring. Available in standard factory weight for a 3 to 31/2 lb. pull or light model that reduces pull by at least 1 lb. to a consistent 2 to 21/2 lb., while preserving reliable primer ignition. Competition Spring Kit contains the trigger spring, firing pin safety spring, and standard power striker spring. SPECS: Spring stainless steel wire. Fits all Glock pistols.

#### AGENCY ARMS FLAT-FACED TRIGGER For GLOCK®

Smooth, Consistent Pull & Short, Crisp Reset -**RED Models Available ONLY from Brownells** 

Installing this trigger is the quickest, easiest way to make a major upgrade to the performance of your Glock. This is a drop-in upgrade - meaning you can do it yourself in a few minutes that gives your Glock a noticeably smoother trigger

pull with minimal pre-travel and a short, snappy, positive reset that gives you a distinct tactile & audible signal when trigger is reset and ready for the next shot. A high-polish trigger bar and a Glock factory "minus" trigger connector work together to produce a consistent. even, 3.5 lb. pull that's light enough to promote better accuracy yet safe enough for use on duty/carry pistols. The function of the critical factory safety lever in trigger face is fully maintained. Many precision shooters prefer the flat-faced trigger shoe because it reduces the contact area between the finger and trigger. This gives you better control throughout the pull and lets you control perceived pull weight by positioning your finger higher or lower on the shoe for the precise amount of leverage. A "toe" at the bottom of the shoe serves as an indexing point so you won't put your finger TOO far down. Model for Standard (STD) frame pistols fits Gen3 or Gen4 G17, 19, 22, 23, 26, 27, 31, 32, 33, 34 and 35 pistols. Large frame fits any generation .45 ACP and 10mm pistols. There's a separate model just for the G43, which is fitted with a Ghost, Inc., connector, and a Gen5 model available only in red that fits only the Gen5 model 17, 19, 19X, 26 and 34 pistols. Red models are available exclusively from Brownells and have an eye-catching red anodized finish on the trigger shoe that will contrast nicely with your pistol's frame and slide.

SPECS: 6061 T6 aluminum, hardcoat anodized, black, gray, or red. Polished stainless steel connector, trigger bar & pin

#### APEX TACTICAL FN 509 & FNS 9C -**ACTION ENHANCEMENT TRIGGER KIT**

Love Your FN Pistol But Wish for a Better Trigger? Here's the Solution!

Apex's upgrade kit will give your 509 a lighter, smoother trigger pull with less pre-travel, shorter overall pull length, AND a shorter (therefore faster) reset. Like Apex's Action Enhancement Kits for the S&W M&P and SIG pistols, it's an easy-to-install replacement for your 509's factory trigger, trigger bar, and sear - basically a drop-in DIY

trigger job! When installed, the Apex FN 509 Action Enhancement Kit will reduce the trigger pull weight to approximately 5.5 lbs.; actual weight will vary slightly from one FN 509 to another. Rather than the OK-but-not-great feel of the plastic factory trigger, Apex's trigger is made of machined aluminum with their trademark "Flat Face." Many shooters prefer the flat face for its more comfortable feel and precise control akin to a 1911 target trigger. The polished stainless steel sear and trigger bar help keep the pull SMOOTH. At the same time this "AEK" will not alter the function or reliability of your 509's factory trigger safety, firing pin safety, drop safety, or out-of-battery safety. Want the improved trigger pull but you're a traditionalist when it

#### APEX TACTICAL S&W M&P FORWARD SET SEAR & TRIGGER KIT

**Drop-In Upgrade Gives** Smoother Pull, Faster Follow-Up Shots

Drop-in kit gives your M&P a much smoother, shorter trigger pull with a cleaner break than the factory trigger - similar to that of a classic 1911 pistol. Reduces take up and overtravel, and moves the sear break point farther forward to cut

down on the length of the pull. A shorter pull means better accuracy and faster follow-up shots. Comes with two interchangeable trigger return springs, one for a 4 lb. pull, the other for a 5.5 lb. pull, so you can further customize the trigger to your needs. Trigger shoe retains the pivoting safety bar to prevent unintended operation. SPECS: Trigger - aluminum, matte black anodized. Sear - hardened steel. Fits all Smith & Wesson M&P pistols, except Shield. Note: older, earlyproduction guns with 1/16" dia. sear plunger and spring require upgrade to new-style sear housing block with 1/8" dia. sear plunger and spring. Kit includes trigger, sear, striker block & spring, sear spring, RAM spring, trigger slave pin, 2 trigger return springs, installation tool, and instructions.

#### APEX TACTICAL S&W M&P **POLYMER TRIGGER KIT**

#### Reduces Travel & Improves Felt Trigger Pull

Enhancement kit features a polymer trigger with improved geometry and redesigned safety lever that is more comfortable and controllable than the original.

AEK Kit reduces pre-travel by 20 percent; Forward Set Kit reduces pre-travel and over-travel and comes with Forward Set Sear, and Striker Block Kit, as well as two return springs that allow the shooter to choose between a 4 pound and a 5.5 pound pull weight. SPECS: Polymer AEK Trigger Kit includes Apex Polymer Action Enhancement Trigger, Heavy Duty Sear Spring, Apex Trigger Return Spring Slave Pin. Forward Set Polymer Trigger Kit includes Apex Polymer Forward Set Trigger, Forward Set Sear, Ultimate Striker Block Kit, Polymer Forward Set Spring Set. Fits all S&W M&P Semi Auto Pistols in 9mm, 40 S&W, 357 Sig, and 45 ACP. Does not fit the M&P Shield.

#### APEX TACTICAL WALTHER PPQ FLAT-FACED FORWARD SET TRIGGER & TUNED TRIGGER BAR

Smoother, Shorter Pull, Snappy Break & Faster Reset

> Developed at the reguest of Walther USA, this trigger unit brings the

benefits of Apex's FFFS trigger for the M&P to the PPQ. It's a direct drop-in replacement for the plastic factory trigger and trigger bar that gives the PPQ a smooth, crisp "1911-esque" trigger pull with about 40% less overall travel than the factory trigger. So you get a significantly smoother (did we mention that?) pull with shorter takeup, less overtravel, and a much shorter reset, all of which helps you shoot more accurately. Apex's upgrade is designed for the competition shooter, but any PPQ fan will enjoy its benefits, especially since it fully maintains the factory trigger's center-mounted pivoting safety's values. It's difficult to improve on one of the best out-of-the box factory semi-auto triggers currently produced, but that's exactly what Apex has done here.

SPECS: For use in PPQ M1 and M2 models in 9mm, .40 S&W and .45 ACP. including the Q5 Match model.

#100-018-832	Walther PPQ Flat-Faced Fwd Set	
	Trigger, 7F111C59\$	123.99

A drop-in replacement for the factory trigger that improves the feel and pull of your P320's trigger. Redesigned geometry reduces the pull weight by about 20%, or 2 lbs., from the factory weight. NO tools are required for installation, and these triggers will not interfere with the pistol's drop-test safety. They work in ALL P320 models but DO NOT work in the SIG P250. Choose a traditional Curved Face or a Flat Face that places the finger lower, closer to its natural resting position, so you get better leverage during the pull for more precise control and better shooting. Either way, you get a better, lighter pull! With the Curved trigger you get a 6.25 lb. pull and with the Flat Face trigger, the pull drops to about 5.75 lbs. You can get either trigger alone or with the Forward Set Trigger Bar, which is a drop-in replacement for the factory part. The trigger combined with the FS Trigger Bar gives you an immediate 30% reduction in pull weight, 30% reduction in length of pull, and 20% shortening in reset. The benefits are two-fold: the shorter pull promotes more accurate shooting, shorter reset helps you make follow-up shots faster - and who doesn't prefer a lighter pull? Factory drop safety values are preserved. Kit does not reduce pull weight on X-Series models, but DOES reduce the length of pull by 30%.

Gives A Light, Consistent Pull With A 1911-Like Feel

Drop-in replacement for factory trigger has less pretravel and over-travel to give your M&P total trigger travel distance similar to most factory 1911-type pistols. Lets you put your finger lower on trigger face for increased leverage so you can take advantage of lower trigger pull weights for competition, such as USPSA Open and

Limited Division. Trigger face replicates the feel of a flat 1911 trigger, while retaining the pivoting safety to preserve factory safety values. Smooths uptake and reset, while reducing pull weight to between 4 and 5 lbs. (can be set as low as 3 lbs. with lightweight springs - not recommended for duty/carry use), all giving you better control for consistent shot placement. Fits all S&W M&P centerfire pistols manufactured after June 2011, except Shield. Installation may require minor gunsmithing. Available with trigger shoe in matte **Black**, or if you want to stand out from the crowd, Flat Dark Earth (FDE), Red, Blue or Purple anodized finish. Separate model for M&P M2.0, and for you traditionalists, you can get this kit with a **Curved** trigger shoe. SPECS: Kit includes trigger, sear, striker block and spring, 2 trigger returns

spring, sear sprin	g, RAM spring, and polymer slave pin.

#### APEX TACTICAL S&W M&P 0 **ACTION ENHANCEMENT** TRIGGER + DUTY/CARRY KIT

**Drop-In Upgrade Kits** Take Your M&P's Trigger from Factory to Fantastic!

Apex's Action Enhancement Trigger Duty/Carry Kit is engineered to give your M&P a smoother, more consistent, lighter (5 to 51/2 lb.) trigger pull with a shorter reset than the factory trigger. Pre-travel and over-travel are reduced by ap-

proximately 20%, while the rounded face gives the shooter's finger a comfortable surface when firing. Pull weight is still safe for duty/ carry applications, and the center-mounted pivoting safety maintains the original factory safety values. Even better, you can get this kit with an economical yet ergonomically pleasing Polymer trigger shoe (with matching or contrasting color on passive safety lever) a machined **Aluminum** shoe that provides a pleasantly solid, reassuringly secure contact point for the finger. These components are engineered for drop in installation and normally should not require further gunsmithing. However, armorer or gunsmith installation is recommended. Separate kits for M&Ps chambered in 9mm/.40 S&W and .45 ACP. Will NOT work in M&P M2.0 or .22 LR models. See separate listing for M&P Shield kits. Kit contents: trigger, heavy-duty sear spring, fully machined sear, duty/carry spring set, Ultimate Striker Block Kit, and slave pin for installing trigger return spring.

#### APEX TACTICAL S&W M&P SHIELD **ACTION ENHANCEMENT TRIGGER KITS**

Gives An Already Great Carry Pistol A Superb Trigger - Smoother Pull. Shorter Travel

Replacement for the factory trigger gives your Shield a smooth, oil-on-glass pull and helps reduce pre-travel and over-travel by approximately 20%. Smooth trigger face is shaped to encourage the shooter to place the finger in the center of the trigger, directly in line with the bore axis to resist unwanted movement that can compromise accuracy. Trigger return spring sets the trigger pull weight at approximately 5 lbs. and increases uptake pressure. Center mounted pivoting safety bar maintains factory safety standards and will not disengage unless the trigger finger is placed directly on the trigger face. All these triggers have a traditional curved face Drop-in Duty/Carry Action Enhancement Trigger Kit contains anodized aluminum trigger, fully machined sear, Ultimate Striker Block/spring, shield spring set, sear spring (1/8"), trigger slave pin, 4 lb. rated trigger return spring and Talon Tactical tool. Trigger Only works with Apex Shield Carry Kit or as a stand-alone with the factory sear and other components. **M2.0** is only for use on Shield M2.0 pistols; NOT for use on firstgeneration Shields.

SPECS: Aluminum trigger shoe, gloss black or red hardcoat anodized. Separate models for M&P Shield chambered in 9mm/.40 S&W (9/40) and .45 ACP. Trigger comes with trigger return spring installation slave pin. Kit also includes machined sear. Ültimate Striker Block, striker block spring, carry spring set, sear spring, 4 lb. trigger return spring, installation tool, and instructions.

#### CYLINDER & SLIDE COLT.380 **ALUMINUM TRIGGER**

Replaces The Plastic Factory Part For Better Wear, Improved "Feel"

Long-wearing, CNC-machined, aluminum trigger easily replaces the Colt factory nylon/plastic trigger for increased durability and a more solid feeling trigger pull. Use as a standalone enhancement or part of a complete trigger job. Installation may require slight modification; completely eliminates premature trigger wear breakage at the trigger pivot pin hole.

SPECS: Aluminum, matte silver. Fits Colt. 380 Government and Mustang models

#### **ACTION ENHANCEMENT KITS** for CZ, S&W & SPRINGFIELD ARMORY

Smoother, Lighter, More Precise Triggers for CZ 75, Hellcat & Other Popular Pistols

Apex has extended their re-engineering magic to more popular pistol platforms. As with their earlier Action Enhancement Kits, the benefits are smooth, lighter, shorter trigger pull without annoving creep, cleaner break, and shorter overtravel for faster reset. Basically, a darned better trigger that does not come near to rivalling the cost of the gun. Kits are easy to install following the instructions and/or videos on Apex's website.

CZ PISTOLS - These kits reduce the difference between the feel of that first double-action pull on your CZ's trigger and the pull on the subsequent single-action shots. How much of a difference? Typically about 2 lbs. Each kit comes with "Carry" and "Competition" mainsprings. Install the Carry

spring and you get a DA pull of about 7 lbs., followed by a single-action pull of 5 lbs. The Competition spring will drop the DA pull to 6 lbs. and the SA to 4.5 lbs. (Pull weights are approximate and will vary from one gun to another.) Each kit also contains direct replacements for the factory hammer and sear, two hammer pins, and a reduced-power firing pin return spring. Sear and hammer are precision-machined to provide a clean single-action trigger break and a smooth, stackfree double-action pull that's consistent all the way. Engagement surfaces are matched, so no stoning is required for a precise fit. Separate models for Thumb Safety CZ 75B (not for use on Omega models either) and Decocker CZ 75B, including the SP-01 Phantom and the SP-01 Tactical. CZ P-10 fits 9mm S, C, and F models ONLY. (Does not fit .45 ACP or Micro models.) Designed for use with CZ factory #19 trigger bar and later. Reduces pull to less than 4 lbs. with included Performance Disconnector (5.5 lbs. if you retain factory disconnector). Kit contains a flat-faced trigger, Performance Disconnector, and rear slide cover plate. Shadow 2 kit gives 6 lb. DA / 4 lb. SA Carry pull weights and 5.5 lb. DA / 3.5 lb. SA Competition pull weights.

SMITH & WESSON SD SERIES - Kit reduces trigger pull weight by approximately 2 lbs. from the factory weight, while reducing pre-travel by 20% and over-travel by 10%. Fits SD9, SD40, SD9VE and SD40VE (not for use in Sigma pistols). Kit includes Action En-

hancement Trigger, plus 4 critical springs for trigger return, striker, aftermarket springs, Trigger also sold separately.

SPRINGFIELD HELLCAT - Includes a dropin aluminum replacement for the factory polymer trigger, plus sear and striker springs. Produces a smoother trigger pull with reduced travel, a lighter pull weight in the 5 to 5.5 lb. range (after break-in period), a crispclean break, and shorter/faster reset with less overtravel. Center-mounted pivoting safety lever maintains factory safety values.

#### **APEX TACTICAL ACTION ENHANCEMENT KIT** for GLOCK® 0

Some Shooters Complain About the Glock Factory Trigger -Here's the Solution

Like Apex's other trigger upgrade products, this is a direct,

drop-in replacement for the plastic factory trigger that reduces pre-travel, overall trigger travel, and reset. Gives you a smooth take-up and reset surrounding a nice, crisp trigger break. The machined aluminum trigger shoe and safety lever are ergonomically contoured for the finger to nestle comfortably on them - and feel much solider than the plastic trigger. Apex's Ultimate Safety Plunger significantly smooths out the trigger take-up compared to the factory component, while maintaining the factory's critical safety values. You also get a polished stainless steel Gen3 trigger bar that works fine on Gen4 guns (some kits available without the trigger bar), plus Apex's Performance Connector that reduces the factory trigger pull weight by approximately 1 lb. Couple that with the shorter travel and smoother pull, and we expect Glock critics will be converted to fans!

#### LONE WOLF ULTIMATE ADJUSTABLE TRIGGER for GLOCK®

Better Feel & Control Than Factory Trigger - Adjust While It's in the Gun

> A trigger that can be adjusted without removing it from the gun? What more can you say but WOW! Lone Wolf's drop-in, all-aluminum trigger comes with a hex wrench that lets you perform fine adjustments to pre-trav-

el and over-travel while it's still in the gun. The smooth, symmetrical shoe has gently radiused edges for a comfortable finger/trigger interface, and the safety lever also sits flush with the surface of the shoe when depressed. Helps you control the pull better and keeps your finger from getting raw during long shooting sessions. Comes with trigger bar already attached for easy installation in your Glock®, but the two-piece design enables easy removal of the bar to swap in a different bar. Manufactured to tighter-than-factory tolerances to get minimal wobble between the shoe and trigger bar for a tighter, cleaner, more precise trigger pull, 9mm/.40 S&W/.357 SIG model is intended for Gen3 and Gen4 pistols; does not fit G43. Separate model for .45 ACP/10mm pistols.

#### **OVERWATCH PRECISION** POLYMER DAT TRIGGER for GLOCK®

"Big Bang for the Buck" Drop-In Trigger Upgrade

Here's your dilemma: you

want to upgrade the trigger in your Glock® to an Overwatch Precision DAT aluminum trigger, but you're on a tight budget. And frankly, you have no problem with the feel of a plastic trigger shoe. The folks at Overwatch have come up with the solution: install their Polymer DAT Trigger. You enjoy many of the key the benefits of their aluminum Defensive Applications Trigger (DAT), with a lower sticker price. As with the aluminum original, the polymer trigger shortens the pull distance by as much as 20% (depending on frame tolerances), making it an excellent option for shooters with shorter fingers. ALL shooters, regardless of the length of their digits, will appreciate the faster, more positive, clearly-defined pull, followed by a short, positive reset. The broad, flat trigger face permits a straight, uniquely self-correcting rearward press. Pre-travel has been reduced as much as possible without risking safety, so you revel in a clean, crisp break and almost nonexistent overtravel. Most importantly, all of these benefits DO NOT come at the expense of compromising reliable operation of the factory safeties. Solid-body, molded hard-polymer trigger shoe and safety lever. Polished stainless steel OEM Glock trigger bar installed. Drop-in ready for Gen1 thru Gen4 Glock® pistols. WILL NOT fit Gen5 or G19X pistols. Models for Standard (9mm, .40 S&W & .357 SIG) and Large Frame (.45 ACP & 10mm Auto) pistols, plus separate model for the G43. Now, you can go ahead and get a quantum leap in the quality of your Glock's trigger pull - without putting a dent in the debit card balance that gets you in the doghouse with your Signifi-

#### **SIG SAUER P320 & P365** FACTORY FLAT-FACED TRIGGERS

Better Control & More Leverage for Up To a 30% Reduction in Trigger Pull

lar in recent years. A lot of folks find that they allow them to position their finger lower on the trigger face, at precisely the best point for maximum leverage. Some even insist that a flat trigger produces lighter pull than a traditional curved trigger. It gives you better control and a better feel of how the trigger is stacking before it lets off - all leading to a smoother, more consistent pull and better control. SIG Sauer now offers to the aftermarket their factory flat-faced triggers, so you can upgrade your pistol with a part that's designed to fit it. Stainless steel, with a matte black oxide finish. P320 trigger is available with a Solid or Skeletonized shoe and produces a 30% trigger pull weight reduction compared to a stock curved P320 trigger. Does the weight reduction on the skeletonized model make a real difference? We can't say, but it sure looks cool! Fits P320s in 9mm, .357 SIG, .40 S&W, and .45 ACP. Trigger only; retain all your pistol's other parts. P365 model is also a direct replacement for the stock trigger. Includes trigger assembly itself, pivot pin, and trigger bar spring.

#### TANDEMKROSS RUGER® MARK IV™ VICTORY TRIGGER

Easty-To-Install Upgrade For A Straight, Precise, Lighter-Feeling Trigger Pull

The Victory Trigger is a lightweight, skeletonized trigger that enables the shooter to pull straight back and instantly know if he's pulling too far to the left or right. With its flat-faced design, the Victory gives an excellent "feel" and better control. It encourages the shooter to place the finger lower on the trigger, increasing leverage to give the perception of a lower pull weight without compromising reliability and safety. Pronounced cross-hatch texturing on trigger face gives a no-slip hold that further enhances control. Pre- and over-travel adjustment screws let each shooter customize the trigger pull to his taste. Machined aluminum trigger shoe with durable hard-anodized finish in black or sliver. Gives the shooter a great advantages in speed shooting and other competitive shooting sports!

SPECS: Does not fit Ruger Mark IV™ 22/45™, 22/45™ LITE™ or older Ruger® Mark III™ (and related 22/45™ version)

### **TIMNEY TRIGGERS** ALPHA COMPETITION TRIGGER for GLOCK®

#### Drop-In Upgrade Gives a Smooth, ~3 lb. Pull With Clean Release & Virtually NO Need for Lubrication

The Timney crew has been in the drop-in trigger upgrade biz for a long time - 75+ years, actually - so you know it was just a matter of time before they got around to a drop-in trigger upgrade for the Glock® platform. Here it is! This trigger is built to give you a smooth pull of approximately 3 lbs. (varies from one gun to another) without sacrificing any of the legendary reliability, safety, and durability built into your Glock®. It has a Teflon®-nickel (NP3) coated trigger bar and sear, along with a black-anodized aluminum trigger shoe with a flat face. The result is a crisp, clean trigger pull that lets off at that magical ~3 lb. point. The NP3 coating virtually eliminates friction, allowing for an extremely smooth feel. Independent testing showed the Alpha trigger fired 10,000 rounds with no oiling and no cleaning - and it performed flawlessly with ZERO malfunctions. Other than these components, the Timney Alpha trigger uses all of your Glock's factory components and springs. And it's so easy to install, you'll be making smoother, more precise shots in no time. Includes a C-clip washer to enhance the mounting of the Timney sear assembly into the trigger housing. Gen3-4 model fits the Gen3 and Gen4 variants of the G17, G19, G22, G23 and G34. Gen5 model fits Gen5 versions of Glock 17, 19, 19X, 22, 23, 26, 27, 33, 34, 35, 44 and 45. Yes! It fits the .22 LR G44 model.

# PRO TRIGGERS for GLOCK® Manuellin

Forget About the "Mush!" - A Smooth, Precise, Superbly Responsive Trigger in a Drop-In Kit

**ZEV TECHNOLOGIES** 

Built from the ground up to perform better than your pistol's original factory trigger, the Zev Technologies Pro Trigger reduces travel while providing a crisp,

clean pull with a glass-like break. At the core of the Pro Trigger is the improved geometry of Zev's proprietary trigger bar and connector that eliminate the mushy feel associated with factory triggers. Plus. it gives a consistent, positive reset and a reduction in trigger pull weight, without sacrificing the reliability or safety. The wide trigger pad and safety give you better control with less fatigue, especially during those long training sessions. Most importantly, this enhanced feel and performance does not compromise the reliability of the factory safety system. Trigger shoe is made of machined aluminum alloy with a tough, matte black (BLK) hardcoat anodized finish. Available with a contrasting Red safety lever because... it looks cool. Other parts are hardened stainless steel for durability, with engagement surfaces polished to a mirror-like finish to reduce friction. Basic **Pro** Trigger includes trigger shoe, trigger bar, and connector. Fits standard frame Gen1 thru Gen4 Glock pistols in 9mm, .40 S&W and .357 SIG (models 17, 17L, 19, 22, 23, 24, 27, 26, 31 thru 35, 37, 38 and 39. Separate model for Gen5 pistols: 17, 19, 19X, 26 and 34. Kit delivers even greater refinement to the trigger pull and comes with a reduced-power striker spring to produce a lighter-feeling pull for competition; a factory-weight striker spring is included for duty and daily carry. Contains trigger, trigger bar, trigger block, ejector, connector, trigger spring, and a lightweight stainless steel firing pin safety plunger (& spring), plus the two (2) striker springs. Fits model 17, 17L, 19, 26 and 34 9mm-chambered pistols. Separate versions of kit available for Gen1 thru Gen3 and Gen4 guns. Ultimate Kit ups the performance of the standard kit with a skeletonized stainless steel striker. Its reduced mass and highly polished surface speed up lock time and deliver an even lighter, smoother perceived trigger pull, plus ultra-fast reset so you're ready for follow-up shots. **Drop-In Upgrade Parts Improve Trigger Pull** For Competition Or Carry

Drop-in replacements for factory components enhance reliability and optimize the performance of your M&P for different applications. Parts sold separately or in handy kits.

**ACTION ENHANCEMENT KITS** - Installing the **Competition Kit** yields a smooth, consistent, trigger pull of slightly less than 3 lbs., with shorter over-travel and faster reset than a factory-stock M&P. Retain the factory sear spring to get a slightly heavier 3½ lb. pull. Designed for IDPA, USPSA, Steel Challenge, 3-gun,

Competition Kit Shown

and similar types of action shooting competition. Not for duty, carry, or self-defense applications. Duty/Carry Kit delivers a smooth consistent 51/2 lb. trigger pull with less over-travel and shorter reset. Improves performance of your pistol while maintaining its safety features for daily carry. Retain the factory sear spring to get a slightly lighter 5 lb. pull. Both kits engineered for a drop-in fit, though gunsmith installation is recommended.

SPECS: Separate kits for M&P and M&P Shield and M&P Shield M2.0. Kits include hard sear. Ultimate Striker Block (see below), two sear springs (different sizes), and trigger return spring. Duty/Carry Kit also includes competition striker spring and aluminum slave pin for installing trigger return spring. 9/40/357 kits fit pistols chambered in 9mm/.40 S&W/.357 SIG.

<u>ULTIMATE STRIKER BLOCK KIT</u> - Hardened stainless steel striker safety plunger has different geometry and dimensions from the factory part to help deliver an exceptionally

smooth takeup before the trigger bar engages the sear cam. Minimizes drag on the trigger bar as it transitions to the rest point, and gives a more clearly detectable reset. Mirror polished surface for minimal drag. Includes a reduced-power plunger spring to maintain safety integrity while reducing drag. Also includes a tool to aid in fast, easy installation.

SPECS: Heat-treated 17-4 stainless steel, mirror-polished surface. Fits all M&P pistols.

6-pak, 8K19D99 . . . . . . \$ 22.99

#### **ZEV TECHNOLOGIES** V4 CONNECTOR for GLOCK®

Smooth, 3 lb. Pull & Crisp Reset

Gives a clean, lighter-than-factory pull for positive control and "single-action"-like accuracy, while maintaining reliable trigger reset. Precision laser cut from a proprietary steel alloy then heat treated for improved spring tension. Extra-long "slot" prevents

debris build-up and keeps trigger parts clean for smooth, consistent pulls. Produces a trigger pull as low as 3 lbs. in most pistols when used with the Glockworx Competition Spring Kit (available separately). SPECS: Stainless steel alloy, polished. Fits all Glock models.

#### **GHOST**

#### **ROCKET 3.5 TRIGGER KIT for GLOCK®**

**Provides Short Pre-travel** & Fast Reset

Drop-in kit with newly designed self-cleaning trigger connector helps eliminate bothersome pre-travel

and allows fast reset for improved accuracy and quick shot recovery. Trigger connector features a self-cleaning debris channel that reduces accumulation of grit and residue for less friction, longer service life, and improved reliability; connector may require minor fitting. Installation requires no permanent alteration to pistol. Not for use for self defense with 4 lb. firing pin spring or 2 lb. firing pin safety spring. For self defense use with 10mm/.45 caliber Glock, a Wolff 6 lb. firing pin spring and factory Glock firing pin safety spring are recommended

SPECS: Trigger Connector - Stainless steel, polished finish. Springs - Tempered steel. Includes 2 lb. firing pin safety spring, 4 lb. firing pin spring, 6 lb. trigger spring, armorer's orange slide cover plate, and armorer's tool. Fits all Glock models

#100-003-306 Rocket 3.5 Trigger Kit for Glock, 7K34K84 ...... \$ 40.99

one of the M&P's few weaknesses: occasional extraction failures. The FRE is designed to ensure consistent, reliable extraction under highly adverse conditions. Engagement surfaces are wire electrical discharge machined (EDM) to precise tolerances for a drop-in fit (usually-in-

dividual guns may require minor fitting) and exceptional reliability and function. With the FRE installed, M&P shooters have reported as many as 2,500 rounds through their pistols without a single extraction failure.

SPECS: Fits all Smith & Wesson M&P pistols. .45 ACP pistols may require minor fitting.

#100-006-043 Failure Resistant Extractor, 7F39K59... \$ 43.99

ured factory springs. **Duty/Carry Spring**Kit includes a trigger return spring, a slave pinto aid in installing the return spring, and two sear springs. Select the spring springs and two sear springs. Select the springs are springs. that works best in your pistol. Competi-

tion Spring Kit adds a competition striker spring and gives a 3 lb. trigger pull when used with the Hard Sear and Ultimate Striker Kit. SPECS: Fits all M&P pistols, recent and older manufacture. Will not fit pistols adapted for sale in Massachusetts.

#100-006-037	Competition Spring Kit, 7F22J49	\$ 24.99

#### **GHOST TRIGGER CONNECTORS** for GLOCK®

#### Lightens & Improves Trigger Feel

and sporting use. Tactical 5.0 and Rocket 3.5 reduce trigger-pull weight to 5 lbs. and 3.5 lbs. respectively; both have an extra tab that contacts the trigger bar and prevents overtravel after the striker falls. Both may require minor fitting.

SPECS: Stainless steel, polished finish. Fits all models.

#100-000-936 Ghost 3.5 Trigger Connector, 7K11J89 . . \$ 13.99 #100-000-631 3.5 Rocket Connector, 7K23N19...... 28.99 #100-000-935 5.0 Tactical Trggr Connector, 7K19H19. 23.99

3.5 ULTIMATE & 4.5 RANGER - Stainless steel connectors reduce trigger pull weight to 3.5 lbs. and 4.5 lbs. respectively. Debris channel "hole" is self-cleaning and reduces friction of trigger parts for smooth, reliable pulls.

#100-002-007	3.5 Ultimate Connector, 7K19C99 \$ 24.99	)
#100-002-008	4.5 Ranger Connector, 7K18A39 22.99	•

**EDGE 3.5** - Delivers the light, smooth pull and self-cleaning capabilities of the Ultimate and Ranger, plus the additional benefit of eliminating the bump or "hitch" that is the first resistance you feel as you squeeze

the trigger and the trigger bar "bumps" into the connector. Some shooters dislike the hitch; with the Edge 3.5 connector, they don't have to worry about it any more.

SPECS: Stainless steel, polished finish. Fits all Gen 1 thru 4 pistols, except 42/43.

#100-017-395 Edge 3.5 Trigger Connector, 7K20D39 . . \$ 23.99

MINUS 3.5 CONNECTOR - Provides the 3.5 lb. trigger pull of the factory "-" connector, but its highly polished stainless steel surface makes the pull smoother, lighter, and more consistent. Less resistance counteracts the urge to jerk the trigger and compromise accuracy. Resets faster, too, for faster follow up shots. Requires no permanent alterations to pistol, so the factory connector can be reinstalled. Fits all Glock pistols, except the 42 and 43.

#100-018-171 Minus 3.5 Trigger Connector, 7K8J79...\$ 10.99

ARMORER'S SLIDE COVER PLATE - A "must have" for easy, error-free installation of Ghost Rocket 3.5 and Ghost Tactical 5.0 trigger connectors. Plate is sectioned by one-third to permit viewing the sear and firing pin engagement during connector installation.

SPECS: Clear polymer with grooved face.

#### **GHOST**

#### PRO 3.3 TRIGGER CONNECTOR + **SPRING KIT for GLOCK®**

#### Fine Tunes & Improves Glock® Trigger Pull

#### The Ghost Pro 3.3 trigger connector makes a great gun even better! It eliminates that annoying pre-travel "bump" when the trigger hits the connector, forcing you to

drop-in: minor fitting IS required.

**INVVVVVVVVVVVVVVVVVVVVVVVVVVVVV** 

squeeze the trigger harder and pull the gun off target. The Pro 3.3 also gives your Glock® a smooth, crisp, light 3.3 lb. trigger pull that helps promote consistent accuracy. It will also helps correct trigger over-travel, which can further rob accuracy. Complete spring kit included with lightweight competition striker spring (4 lb.), extrapower self-defense striker spring (6 lb.), reduced-power safety block plunger spring, and trigger spring with nearly 30% more power than factory spring. To improve particular aspects of the trigger pull, specific springs can be changed or do a complete upgrade. Fits all Gen1 through Gen5 pistols (yes, even Gen5!), except G42/G43. NOT

#100-024-357 3.3 Pro Connector & Sprg Kit. 7K40I49. . \$ 44.99

### GHOST RUGER® SR9®/SR9CTM/SR40TM

Trigger Pull & Over-Travel Redesigned connector reduces the factory trigger pull down to 31/2 to 5 lbs., while it drastically shortens or completely eliminates accuracy-robbing over-travel. A debris channel lets dust, dirt, grit,

and other foreign matter exit the trigger system, helping to ensure reliable function. Drop-in, no-gunsmithing installation; comes preset for minimum over-travel. SPECS: Steel, polished, natural finish. All models fit Ruger SR9, SR9c,

and SR40 pistols. #100-005-898 Ultimate 3.5 Trigger Connector,

7K16J99.....\$ 19.99

#### GHOST EDGE & PRO TRIGGER CONNECTORS for GLOCK® 42/43

#### Smooths, Lightens & Improves Trigger Feel

Just because you carry a compact pistol doesn't mean you have to accept a stiff, rough trigger pull. These replacements for your Glock 42/43's factory trigger connector improve the entire trigger pull by shortening the overall pull, eliminating over-travel, and

providing a faster reset. Reduces pull weight by approximately 3 lbs., giving a smoother, lighter pull. Also removes the notorious "Glock bump" caused by the trigger bar hitting the connector, which makes the shooter apply extra force to get over the bump, typically moving the pistol off target. **Edge** is a drop-in replacement for factory part. Pro requires minor fitting (instructions included) to get the cleanest, smoothest release possible.

#### ZEV TECHNOLOGIES GLOCK® GEN4 **TITANIUM PIN SET**

Lightweight, Hard Titanium **Replacements For Factory Pins** 

Replacements for factory pins in lightweight, wear-resistant Titanium will outlast your gun's frame. Machined to precise

dimensions for snug fit so they resist creeping out of the frame. Kit includes trigger pin, locking block pin, standard-length ejector housing pin, and extended ejector pin.

SPECS: Titanium, natural silver finish. Fits all Glock® Gen4 pistols, EXCEPT Models 36, 42 and 43.

#100-006-596 Gen 4 Titanium Pin Set. 8B35M14 ..... \$ 36.99

#### **APEX TACTICAL ULTIMATE SAFETY PLUNGER** for GLOCK®

#### Gives Smoother, More Consistent Trigger Pull

Drop-in replacement for factory safety plunger gives a smoother, more precise trigger pull without compromising reliability. Operates in the same manner as the original, blocking the striker channel to prevent the firing pin from moving forward unless the trigger is manually pulled to the rear. Maintains timing with aftermarket trigger systems. Hardened stainless steel, for extended service life, too. SPECS: Machined 440C stainless steel, haredned to Rc 48-54. Fits Glock 17, 19, 22, 23, 26, 27, 31, 32, 33, 34, 35.

#100-014-903 Ultimate Safety Plunger, 7F15Q29 ..... \$ 17.99

#### LONE WOLF 3.5 CONNECTOR for GLOCK®

Drop-in replacement connector gives an immediate improvement in trigger performance on any Glock pistol. Provides the same 3.5 lb. trigger pull as the factory connector, but its 25% lighter weight and a highly polished, nickelplated surface makes the pull smoother and more consistent. Helps the trigger reset more quickly for faster follow up shots and less temptation to jerk the trigger and compromise accuracy. Requires no permanent alterations to pistol, so factory connector can be reinstalled any time. Use in conjunction with Lone Wolf Ultimate Trigger Stop (available separately) for an even cleaner pull. Available alone or paired with Lone Wolf's 6 lb. Trigger Spring, a popular upgrade for an even better trigger pull.

SPECS: Steel, nickel plated, high-polish finish. Fits all Glock pistol models, except G42 & 43.

#### LIGHTING STRIKE TITANIUM SAFETY PLUNGER for GLOCK®

#### Helps You Get A Smoother, Lighter Trigger Pull

Extremely lightweight titanium safety plunger reduces mass for a lighter felt trigger pull. Titanium nitride coating reduces friction. One of those small detail that helps complete a Glock trigger job. Includes Wolff safety plunger spring.

SPECS: Solid titanium, titanium nitride coated. Small - fits all other Glock pistols, .1 oz., (2.8 a) weight, Large - fits Model 21 and 30 pistols

Small Safety Plunger	
Large Safety Plunger	

#### SPRINGER PRECISION SPRINGFIELD XDM TRIGGER/SPRING KITS

For A Smooth, Crisp Trigger Pull

CNC machined components allow a smooth, crisp trigger with a much lighter pull and more precise letoff for better accuracy and fast followup shots. Cuts sear pretravel by about 1/4" to help increase control and pre-

vent accuracy degrading creep. Kits include the reduced-travel sear with pre-polished face, heat-treated to Rc 45-50, plus trigger and sear springs, trigger bar, 10% reduced power striker spring and 15% extra power striker spring. Lightens trigger pull by approximately 1 to 11/2 lbs ==

SPECS: Steel, in-the-white. Includes: Sear, heat treated to Rc 45-50, trigger/sear springs, and trigger bar. Striker Springs - Steel, tempered, (1) 10% reduced power, (1) 15% extra power.

#### CYLINDER & SLIDE BROWNING HI-POWER HAMMER, SEAR & SPRING SET

**Premium Components For** A Smooth, Crisp, Trigger Pull

Four-piece, target set allows precise fitting for sear engagement to greatly improve trigger feel and function. Includes a heat-treated, CNC-machined sear; 21 lb., reduced-power, hammer spring; factoryweight, firing pin spring and commander-style hammer for no-bite, shooting comfort. CS281 features a standard, round spur hammer with narrow, chamfered edges to eliminate drag. CS285 has

chamfered ring hammer with deep, contoured back for less weight and reduced lock time. Tool steel sear replaces the factory, cast part; polishes easily and holds its angles for thousands of rounds. Hammer is blued. Includes instructions. Gunsmith fitting recommended. SPECS: Hammer - 4140 chrome moly, carbon steel; blue finish or silver, hard chrome (HC) finish. Rc 50-53. Sear - Tool steel, in-the-white. Rc 50-53. Hammer Spring - 21 lb. (9.5 kg) reduced power, factory is 32 lb. (14.5 kg). Firing Pin Spring - Standard weight. Fits Browning Hi-Power 9mm and .40 S&W.

#### **APEX TACTICAL FN 509/FNS HEAVY-DUTY STRIKER & PARTS KIT**

Maybe Not "Failure Proof" (What Is?) But HIGHLY "Failure Resistant"

If its striker breaks or otherwise fails, your FN pistol is dead in the water - with the risk of you joining it if you're in a criti-

cal self-defense situation! Apex's a beefed-up striker is machined from billet stainless steel and heat-treated for extra strength to resist breakage. It's a drop-in replacement for the factory striker on any FN 509, including Mid-Size and Tactical, or FNS-series pistol, including FNS Longslide and FNS Compact. Apex provides ONLY the stirker, so you'll need to retain your pistol's striker spring stop, striker spring stop pin, striker return spring, and striker spring guide. Striker Components Kit contains the striker spring stop and striker spring stop pin. Replacements for lost or AWOL factory parts. Machined, polished stainless steel construction. As long as you're replacing the striker, might as well put in a fresh set of these parts. Fits FN 509, FNS. FNS-C and FN 503 pistols.

TITANIUM, CARBON STEEL,

STAINLESS STEEL, OR WHAT?

Throughout the catalog you'll see similar parts - hammers

and sears for example - made out of all three materials. So

what's the difference, which is better? We'll start with the

simplest choice, **Carbon** or **Stainless** steel. It's really just a

matter of looks, the two metals are so close in wear char-

acteristics, and how smooth a finish you can achieve on the

hooks and notches, that it comes down to what you like. If

you want a blue hammer on a blue gun, pick a carbon steel

part. If you want something to contrast with the bluing, a

stainless steel hammer can be finished to a soft matte, al-

most gray, or polished bright to look much like chrome. Same

goes for a stainless gun, match it, or create contrasts with a

bright or matte blued hammer. Whatever you choose you'll

have excellent wear life out of either a carbon steel or stain-

less steel part. **Titanium** can help deliver the ultimate action

speed, and the lightest possible trigger pulls. An identical part

made from titanium will weigh about 62% as much as its steel

counterpart. If the hammer, strut, mainspring cap and fir-

ing pin are 38% lighter, there's less resistance to overcome

as you squeeze the trigger, hence, a lighter pull. Since the

mainspring can accelerate those parts more quickly, you'll

also get a faster lock time. Less time for the sights to slip

off target! The drawback - you knew there was one - is that

titanium wears much more quickly than steel and can gall

pretty easily, which will slow everything back down. The all-

important hooks on a titanium hammer will lose their sharp

edges much more quickly than those on a steel hammer.

That means you (or your gunsmith) will have to re-stone that

hammer more often and it will eventually wear out, sooner. If you clean and lube regularly to prevent galling and accept the

fact that total life of these parts will be less than steel, the light

weight can help your race gun go really fast. TiN, or Titanium

Nitride, isn't a metal, it's an extremely thin, very hard, smooth

coating that greatly increases the wear characteristics of the

metal to which it is added. A good addition for maximum

service life, and that gold color's a great way to set a gun's

looks apart from the crowd. This is a quick look; if you have

specific questions on your application, call one of our Tech

Support staff, 800-741-0015.

#### HOGUE SEMI-AUTO HANDALLTM GRIP

Comfortable, Non-Slip Grip For Semi-Auto Pistols

Slip-on sleeve offers a contoured, non-slip grip with no gun modifications. Proportioned finger grooves and a slight ambidextrous palmswell give extra support for greater shooting control and point-

soft rubber that dramatically improves shooting comfort and accuracy. Semi-Auto HandAll fits most pistols with full-size grip frame and no grip safety. HandAll Jr. fits most .22/.25 ACP semi-auto pocket pistols. Glock model fits all full-size and compact Glock® pistols, plus other similarly proportioned semi-autos without a grip safety. Kahr/S&W M&P Shield .45 has a generous beavertail that fits Kahr P9/P40/CW9/CW4 and S&W M&P Shield .45 ACP pistols, plus Bersa Thunder 380, Ruger SR22, SCCY CPX-2, Springfield XD-E. Also fits Walther PK380, PPK/S 380, and P22. Springfield fits Springfield XD and XDM chambered in 9mm, .40 S&W, and .357 Sig, and many similarly proportioned semi-autos without a grip safety.

SPECS: Soft rubber, textured, Black (BLK), Flat Dark Earth (FDE) or O.D. Green (ODG) Approximately 2<sup>1</sup>/<sub>4</sub>" (6cm) long 1<sup>1</sup>/<sub>4</sub>" (3cm) wide 3<sup>1</sup>/<sub>4</sub>" (8cm) high

#### LIGHTNING STRIKE GLOCK® & SIG P365 LIGHTWEIGHT STRIKER

#### Cuts Lock Time By Up To 50%!

Ultra-lightweight Titanium Striker for Glock® has significantly less mass than the factory striker, so it reduces lock time by a minimum of 50% for a faster shot and improved accuracy. Drops in with no gunsmithing and no permanent alterations to the firearm required. CNC machined from Titanium and hardened for longlasting performance. Includes Wolff striker spring. Ultra-strong Tool Steel Striker for Glock® is still 32% lighter than factory part, heat treated for exceptional strength and performance with hot loads. Coated with Kolene Nutride for greater lubricity and corrosion resistance. Use pistol's current spring. SIG Sauer P365 striker is made of hardened 17-4 stainless steel, so it's much more robust than the factory part. Fits ALL variations of P365 made to date. Use existing spring. Mission-critical part of the gun - do you really want to risk failure to fire due to a worn out or broken striker?

SPECS: Solid Titanium, TiNi coated gold, EDT150 tool steel, heat treated to Rc 70, or 17-4 stainless steel. Standard Frame fits Glock 9mm/.40 S&W. Large Frame fits Glock 10mm/.45 ACP.

#### WILSON COMBAT BERETTA 92/96 **CHECKERED G10 GRIPS**

A Subtle Upgrade to Your Pistols That's **Practical AND Good-Looking** 

Why should the 1911 crowd get all the benefits of tough, long-wearing, non-slip G10 fiberglass grips? Wilson brings all those benefits to the Beretta 92/96 pistol with these good-looking AND practical grips. They are

machined from G10 fiberglass laminate material for a precise fit with an extra-thin profile so even folks with smaller hands will be able to maintain a hold on their '92 that's both comfortable and secure. And the aggressive checkering means you pistol stays firmly under your control, even during rapid fire with wet hands. The handsome Wilson Combat logo medallion is a bonus. The color is Wilson's "Dirty Olive," which offers a subtle visual difference from traditional black/dark gray but doesn't stand out in the wrong way. Fits full-size Beretta 92 and 96 grip frames. Includes rubber O-rings to replace the factory washers and ensure a snug fit. You'll have to reuse your aun's existing grip screws.

#### SB TACTICAL AK-47/AK-74 **PICATINNY-MOUNT PISTOL BRACE ADAPTER**

**Enables You To Easily Mount Popular** Folding Braces on Your Kalashnikov Pistol

You want to mount a Picatinny brace on your AK-47/AK-74 pistol. There's one problem: your gun doesn't have the requisite MIL-STD 1913 Picatinny slots on the back of the receiver, so you're skunked.... Until you get SB Tactical's BA-AK1913 Brace Adapter. It mounts securely to both flat and sloped AK receivers and, once installed, sets you up to mount an M1913 Picatinny brace on your pistol, including SB Tactical's own FS1913 and TF1913 braces. The adapter is made of 7075 T6 aluminum, with a tough Type III hard-anodized finish. Heavy duty steel forks bear the load of attachment to AK pistol's receiver. An example of a not-very-glamorous little part that makes a huge difference in the world of upgrades it opens up for your gun!

#100-042-397 Picatinny Brace Adapter for AK-47/ AK-74, 1A41N11.....\$ 49.99

#### **KAK INDUSTRIES AR-15 PISTOL** SHOCKWAVE BLADE PISTOL BRACE

Ride the 'Wave to Better Control & More Comfortable Shooting of Your AR-15 Pistol

Pistols based on the AR-15 platform, both in rifle calibers (like 5.56 NATO, .300 AAC Blackout) and actual pistol calibers (9x19mm, .40 S&W, .45 ACP), have become wildly popular in recent years. But let's face it: a handgun build on a rifle platform, even one as compact and lightweight as the AR-15, is a bit of a handful to shoot. KAK's Shockwave Blade solves that problem. It installs on AR-15 pistol buffer tubes and helps you maintain better control over the gun in one of two ways: for one-handed shooting, you can rest the vertical "fin" of the Blade against the inside of your forearm to stabilize the pistol while you're firing OR you can rest the Blade against your cheek for a steady sight picture. Either way, adding the Shockwave Blade makes your AR-pistol a whole lot easier to control and more fun to shoot. Made from lightweight yet high-strength glass-reinforced molded polymer, the 'Wave fits all pistol fiearms equipped with a standard AR-15 pistol buffer tube (up to 1.25" in O.D., including the CZ Scorpion Evo 3, Heckler & Koch HK9X, and others) and a carbine buffer inside. Just slip it on, tighten the large setscrew, and hit the range. Sold as the **Shockwave Blade** ONLY or in the original **Shockwave Kit** that contains the stabilizing Blade, pistol buffer tube, standard carbine buffer & spring, castle nut, and endplate. Comes with a copy of the ATF letter stating that the Shockwave is totally A-OK to install on AR-15 (and similar) firearms designated as pistols. Available colors: Black (BLK), Flat Dark Earth (FDE), O.D. Green (ODG), and Gray.

#### **SIG SAUER** MCX/MPX PIVOTING CONTOUR **BRACE & MCX ADAPTER KIT**

Easy-To-Install Picatinny-Mount Brace for Your SIG Pistol or BRN-180°

SIG Sauer's Pivoting Contour Brace is designed for their MCX/MPX pistols. AND it's an excellent brace for

use on a Brownells BRN-180™ lower receiver, too. In fact, it will fit any AR-15 or AK-type pistol with a Picatinny rail (MIL-STD 1913) attachment interface for a brace. The unique, low-profile forearm cuff opens up like a clamshell to reveal a nylon-web forearm strap. When not in use, this brace folds (pivots) forward parallel alongside the receiver. The brace is short, approximately 10" OAL, but it gives you excellent support for better control and more comfortable shooting of your pistol. Sturdy reinforced molded polymer construction. MCX Adapter enables gives you install an MCX folding brace on a standard AR-15 lower receiver that is mated to an upper receiver that does NOT require the traditional buffer, buffer spring, and receiver extension assembly. We're thinking this is a great way to use a standard AR-15 lower with your Brownells BRN-180™ gas piston upper AND still put an MCX folding brace on it. (Will not work with

#### STRIKE INDUSTRIES **AR-15 & SIG SAUER MCX/MPX PISTOLS VIPER PDW STABILIZER**

Compact, Yet Full-Featured & Comfortable To Give You Enhanced Control of Your AR Pistol

The Viper PDW Stabilizer fits any mil-spec AR-15 receiver and makes your AR pistol vastly

more comfortable and easier to shoot. In its compressed position, the stabilizer enables effortless maneuverability in close quarters and in vehicular operations. With the press of a button, the rapid deployment system instantly springs the stabilizer to the extended position for a more stable shooting platform, better shot placement, and faster reaction time. Installation is wonderfully "drop-in," just like installing a traditional AR-15 carbine buttstock. The on-board buffer system is carefully engineered to deliver extremely reliable cycling AND allows for the use of a standard bolt carrier. The included flat-wire buffer spring increases bolt load, despite the compact dimensions for excellent reliability, even in extremely short-barreled configurations. The rubberized cheek rest provides a secure, comfortable cheekweld, and there are even built-in QD swivel sockets for expanded sling mounting options. The PDW Stabilizer's exterior has had all snag hazards and abrasion zones removed, further ensuring the shooter's comfort. The SIG Sauer MCX/MPX Stabilizer delivers the same benefits to those platforms, including the easy. drop-in installation.

### SB TACTICAL PISTOL BRACES

#### Gives the Shooter Enhanced Control Over Carbine- & SMG-Based Semi-Auto Pistols

The folks at SB started the "Brace Revolution" with their original Brace for AR-15 pistols that made shooting a handgun based on a rifle, carbine, or submachinegun a whole lot more manageable AND fun to shoot. They have continued expanding the line to cover a variety of similar but non-AR based pistols. While originally designed to help handicapped shooters, the concept is the same for all: the Brace can be strapped comfortable to the forearm of the shooting hand for more accurate one-handed shooting with less fatigue OR it can be rested against the shoulder or cheek like a traditional stock for a third point of contact to stabilize the pistol for fast yet carefully aimed shots. Either way, the shooter is able to maintain excellent control over the weapon. The Braces themselves are molded from reinforced hard polymer and fitted with the necessary hardware to "interface" securely and solidly with the receiver of the firearm. All come with a nylon webbing strap for cinching the brace to the shooter's forearm.

**SBA4 5-POSITION BRACE** - This Brace fits firearm platforms that

accept an AR-15 carbine receiver extension (i.e., an adjustable carbine stock buffer tube). It's 5-posi-

tion adjustable for length thanks to the M4 carbine buffer tube that comes with it, and there's an ambidextrous socket for QD sling swivels. The tube is made of extra-strong 7075 T6 aluminum and has a "mil-spec" (1.14") O.D. Sounds like an AR-15 only proposition but in fact, more and more non-AR firearms are coming with adapters to allow use of the many available AR accessories. Buffer and spring are not included.

TF1913™ TRIANGULAR FOLDING BRACE - Minimalist, left side-

folding opentriangle brace fits firearms that have an MIL-STD 1913

Picatinny attachment point at the rear of the receiver. This includes the SIG Sauer MPX and MCX, SIG Sauer Rattler, Rock River Arms LAR-PDS, etc.) The TF1913™ comes complete and ready to install. The robust steel hinge mechanism locks both open and folded; its pull-through configuration enables quick unfolding of the brace. Rigid reinforced polymer structure with flexible arm cuff. Length: 9.5". Width: 1" max. Strap width: 1".

#100-040-259 TF1913 Triangular Folding Brace, Black, 5200HUB. . . . . . . . . . . . . . . . . . \$ 159.99

FS1913™/FS1913A™FORSIG MCX/MPX - The Brace comes to the SIG MCX/MPX platform! This Brace clamps to any firearm with an MIL-STD 1913 Picatinny stock attachment point at the rear of the receiver. The SIG MCX/MPX pistols are the most popular platform that use this interface right now, and the FS1913™ will also fit the SIG Rattler and Rock River LAR-PDS - or any similar firearm with an M1913 stock interface. It's a straightforward "strut" type brace that provides a shooting interface like factory MCX/MPX stock. Folds to

the left, so it will not interfere with the ejection port when stowed.

It deploys in the blink of an eye and locks open with reassuring solidity via the ultra-strong, s m o o t h

operating STEEL hinge mechanism. Locks closed, too, to prevent accidental deployment. It looks spindly, but when extended, the FS1913™ provides a pleasantly secure shooting platform for accurate aimed fire under stress. FS1913™ has a lightweight reinforced polymer strut. FS1913A™ is the same design but with an extra-strong (and still light) aluminum strut for use in high-stress operations.

CZPDW FOR CZ SCORPION EVO - This quick-deploying, length-

adjustable brace tames the sting in your Scorpion's tail during sustained fire. It can be extended in one fluid motion without having to depress a release button. And the user can choose one of three (3) length positions, so it's totally adaptable to fit dif-

ferent shooters. There's even a socket for a standard pushbutton QD sling swivel, so you can also stabilize your Scorpion with a sling. The CZPDW is constructed of strong yet lightweight 6061 T6 aluminum alloy, with a tough hardcoat anodized finish for excellent resistance to surface wear and corrosion. Two colors to choose from: basic Black (BLK) or Flat Dark Earth (FDE). Length: 3.25" (fully retracted), 7" (mid position), and 9.25" (fully extended). Like all SB Tactical braces, the CZPDW enables handicapped shooters to enjoy shooting it even more.

#100-032-040 CZ Scorpion Evo Brace, BLK, 5Z00JXJ .. \$ 228.99 #100-032-041 CZ Scorpion Evo Brace, FDE, 5Z00BYD... 223.99

HKPDW™ FOR H&K MP5 & CLONES - This 3-position adjustable

Brace fits the Heckler & Koch MP5, MP5K, HK53, and "reverse stretch" clones. It features SB's quick-deploying "pull through" system that lets you

extend the Brace just by, well, pulling on it. The rods are steel and the adapter that attaches to the parent firearm is made of 6061 T6 aluminum (hardcoat anodized finish), so it's built for serious use. Integral socket for QD pushbutton sling swivel. Length: 3.2" (fully collapsed), 5.3" (mid position), 8.0" (fully extended). Due to varying tolerances between roller lock manufacturers, gunsmith fitting may be required.

#100-033-457 HKPDW Brace for H&K MP5/MP5K/ HK53 & Clones, 5Z224/39......\$ 263.99

SBT BRACE - This is a sidefolding Brace that fits the B&T APC and the Heckler & Koch UMP pistols. All the necessary mounting hardware is part of it. The styling purposely replicates that of stocks B&T manufactured for

stocks B&T manufactured for various H&K platforms. It's very basic - the OAL comes out to 10.5" - but it gets the job done!

**#100-027-722** SBT Brace, 5Z98H99 ..... \$ 131.99
